About this book. Each paper has 60 multiple-choice questions, one mark each, to be attempted in 80 minutes, with no negative marking. Questions keep their original numbers and option labels, so they match the official KEA answer keys for the version named above. Every question has been retyped and every diagram redrawn from the English version of the paper. Each question carries a tag: Direct (answer stated in the 2026-27 NCERT textbook or an NCERT Exemplar problem) or Applied, with the NCERT page and a tappable link to that chapter's official PDF. Applied questions also name the closest earlier NEET/AIPMT/AIIMS, AIEEE or JEE question, and topics no longer in the rationalised NCERT are flagged. Each paper ends with a one-page analysis.

Prepared by Sumeet Birajadar for Science Monk online classes.

KCET 2026
Physics Question Paper

Day 1 · First Session · Version A1 · 60 Questions · 60 Marks · 80 Minutes

1. Match the physical quantities given in List-I with dimensions expressed in terms of mass (M), length (L), time (T) and electric current (A) given in List-II.

List-I		*List-II*	
(a)	Torque	(i)	$[M^{-1}L^{-2}T^{4}A^{2}]$
(b)	Gravitational constant	(ii)	$[M^{1}L^{2}T^{-1}]$
(c)	Capacitance	(iii)	$[M^{-1}L^{3}T^{-2}]$
(d)	Planck's constant	(iv)	$[M^{1}L^{2}T^{-2}]$

Codes:

APPLIED Class XI Part 1 · Ch 1 · **Page 7** Open PDF ↗

Similar PYQ: JEE Main 2021 (25 Feb, Shift 1) – match-the-list of dimensions (h, E, V, p)

(1) a–iv, b–ii, c–iii, d–i **(2)** a–iv, b–iii, c–i, d–ii
(3) a–iv, b–i, c–iii, d–ii **(4)** a–ii, b–i, c–iii, d–iv

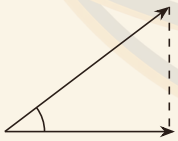

2. A car covers the first half of the distance between two places at 40 km/h and another half at 50 km/h. The average speed of the car is

APPLIED Class XI Part 1 · Ch 2 · **Page 15** Open PDF ↗

Similar PYQ: NEET 2023 – average speed, half distance at 8 and half at 20

(1) 45.00 km/h **(2)** 44.44 km/h
(3) 43.14 km/h **(4)** 42.04 km/h

3. Two bodies are projected with the same velocity. If one is projected at an angle of 30° and the other at 45° to the horizontal, then the ratio of maximum heights attained is

APPLIED Class XI Part 1 · Ch 3 · **Page 39** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(1) 3:1 **(2)** 1:2 **(3)** 4:1 **(4)** 1:3

4. The velocity of a particle moving along x-axis is given as $V = x^2 - 5x + 4$ (in m/s) where x denotes the x-coordinate of the particle in metres. The magnitude of the acceleration of the particle when the velocity of the particle is zero is

APPLIED Class XI Part 1 · Ch 2 · **Page 18** Open PDF ↗

Similar PYQ: JEE Main 2024 (1 Feb, Shift 2), $v = 4\sqrt{x}$; AIEEE 2006, $v = \alpha\sqrt{x}$ – acceleration from $v(x)$

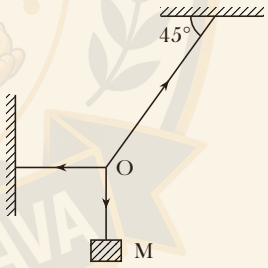

(1) 2 m/s^2 **(2)** 3 m/s^2 **(3)** Zero **(4)** 1 m/s^2

5. A man weighs 80 kg. He stands on a weighing scale in a lift which is moving upwards with a uniform acceleration of 6 m/s^2. What would be his weight in kg? (g = 10 m/s^2)

DIRECT Class XI Part 1 · Ch 4 · **Page 69** Open PDF ↗

(1) Zero **(2)** 48 kg **(3)** 120 kg **(4)** 128 kg

6. A mass M is hung with a light inextensible string as shown in figure. Find the tension of the horizontal string.

APPLIED Class XI Part 1 · Ch 4 · **Page 58** Open PDF ↗

Similar PYQ: AIEEE 2006 – mass on a string held by a horizontal force at 45°

(1) $\sqrt{2}\,Mg$ **(2)** $\sqrt{3}\,Mg$ **(3)** Mg **(4)** $3\,Mg$

7. Two bodies with kinetic energies in the ratio of 3:1 are moving with equal linear momentum. The ratio of their masses is

APPLIED Class XI Part 1 · Ch 5 · **Page 73** Open PDF ↗

Similar PYQ: JEE Main 2021 (24 Feb, Shift 2) – equal momentum, ratio of kinetic energies

(1) 1:4 **(2)** 1:3 **(3)** 1:2 **(4)** 1:1

8. A horizontal force of 5 N is applied on a stationary body of mass 5 kg, which is initially at rest on a frictionless table. The change in kinetic energy of the body in 10 s is

APPLIED Class XI Part 1 · Ch 5 · **Page 88** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(1) 25 J **(2)** Zero **(3)** 125 J **(4)** 250 J

9. The angular momentum of a moving body remains constant, if

DIRECT Class XI Part 1 · Ch 6 · **Page 108** Open PDF ↗

(1) net external force is applied
(2) net pressure is applied
(3) net external torque is applied
(4) net external torque is not applied

10. If the earth were to suddenly contract to half of its present radius, what would be the duration of the day?

APPLIED Class XI Part 1 · Ch 6 · **Page 108** Open PDF ↗

Similar PYQ: JEE Main 2024 (6 Apr, Shift 1) – earth's radius reduced, new length of day

(1) 6 h **(2)** 18 h **(3)** 24 h **(4)** 30 h

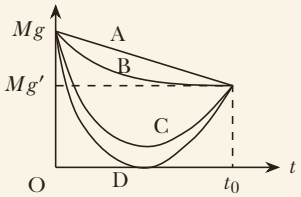

11. Imagine a new planet having the same density as that of the earth, but it is two times bigger than the earth in size. If the acceleration due to gravity on the surface of the earth is g and that on the surface of the new planet is g', then

APPLIED Class XI Part 1 · Ch 7 · **Page 132** Open PDF ↗

Similar PYQ: NEET 2016 (Phase I) – planet with radius and density twice that of earth

(1) $g' = \frac{g}{4}$ **(2)** $g' = 8g$ **(3)** $g' = 2g$ **(4)** $g' = 4g$

12. Suppose the acceleration due to gravity at the earth's surface is g m/s^2 and at the surface of moon it is g' m/s^2. An M kg passenger goes from the earth to the moon in a spaceship moving with a constant velocity (Neglect all other objects in the sky). Which curve best represents the weight (net gravitational force) as a function of time?

APPLIED Class XI Part 1 · Ch 7 · **Page 132** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(1) A **(2)** B **(3)** C **(4)** D

13. Instrument fitted in the carburetor of the automobile to provide the correct mixture of air and fuel necessary for combustion works on

APPLIED Class XI Part 2 · Ch 9 · **Page 187** Open PDF ↗

Similar PYQ: NEET 2023 – "The venturi-meter works on: Bernoulli's principle"

(1) Pascal's Law
(2) Bernoulli's Principle
(3) Newton's Law of Cooling
(4) Archimedes' Principle

14. There are two wires of same material and same length while the diameter of second wire is two times the diameter of the first wire. Then the ratio of extensions produced in the wires by applying same load will be

APPLIED Class XI Part 2 · Ch 8 · **Page 170** Open PDF ↗

Similar PYQ: JEE Main 2023 (30 Jan, Shift 2) – elongation of wires of different diameter

(1) 1:1 **(2)** 1:2 **(3)** 2:1 **(4)** 4:1

15. In a capillary tube experiment, a vertical 30 cm long capillary tube is dipped in water, water rises upto a height of 10 cm due to capillarity. If this experiment is conducted in a freely falling elevator, then the length of the water column becomes

APPLIED Class XI Part 2 · Ch 9 · **Page 196** Open PDF ↗

Similar PYQ: AIEEE 2005 – capillary tube in a freely falling elevator (20 cm tube, 8 cm rise)

(1) 10 cm **(2)** 20 cm **(3)** 30 cm **(4)** Zero

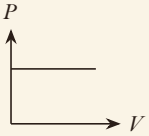

16. In thermodynamic processes, which of the following statements is not true?

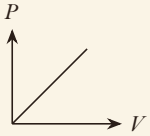

DIRECT Class XI Part 2 · Ch 11 · **Page 234** Open PDF ↗

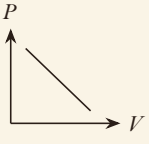

(1) In an isothermal process, the temperature remains constant
(2) In an isobaric process, the volume remains constant
(3) In an adiabatic process, the system is insulated from the surroundings
(4) In an adiabatic process, PV^{γ} = a constant

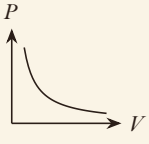

17. The graph of pressure P and volume V of 1 mole of an ideal gas at constant temperature is

DIRECT Class XI Part 2 · Ch 11 · **Page 234** Open PDF ↗

(1) 

(2) 

(3) 

(4) 

18. A mass of 1 kg is executing SHM. Its displacement is given by $x = 6.0\cos(100t + \pi/4)$ cm. What is the maximum kinetic energy?

APPLIED Class XI Part 2 · Ch 13 · **Page 268** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(1) 3 J **(2)** 6 J **(3)** 9 J **(4)** 18 J

19. A source of frequency ν gives 6 beats/second when sounded with a source of frequency 200 Hz. The second harmonic of frequency 2ν of the source gives 8 beats/second when sounded with a source of frequency 420 Hz. The value of ν is

APPLIED Class XI Part 2 · Ch 14 · **Page 294** Open PDF ↗

Similar PYQ: NEET 2013 – beats with 250 Hz; second harmonic gives beats with 513 Hz

(1) 205 Hz **(2)** 206 Hz **(3)** 195 Hz **(4)** 210 Hz

20. Following are statements of a few processes taking place in nature.

I. Free expansion of a gas
II. The combustion of a mixture of petrol and air ignited by a spark
III. The leaking of gas from the kitchen cylinder
IV. The transfer of heat from one heated part of a liquid to the other colder part

Which amongst these processes are irreversible in nature?

DIRECT Class XI Part 2 · Ch 11 · **Page 236** Open PDF ↗

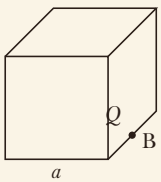

(1) I and II **(2)** III and IV
(3) II, III and IV **(4)** I, II, III and IV

21. An electron falls through a distance of 1.5 cm in a uniform electric field of magnitude 2.0×10^4 N/C from rest. The time taken to cover this distance in second is _____ ($e = 1.6 \times 10^{-19}$ C, $m_e = 9.11 \times 10^{-31}$ kg)

DIRECT Class XII Part 1 · Ch 1 · **Page 17** Open PDF ↗

(1) 2.9×10^{-9} **(2)** 2.9×10^{9}
(3) 4×10^{-6} **(4)** 4×10^{6}

22. What will be the total electric flux through the faces of the cube as given in the figure with side of length 'a' if a charge Q is placed at B, midpoint of an edge of the cube (see figure)?

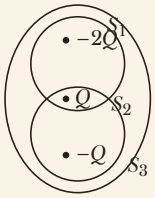

DIRECT Class XII Part 1 · Ch 1 · **Page 29** · Exemplar Q1.19 Open PDF ↗

(1) $\frac{Q}{8\varepsilon_0}$ **(2)** $\frac{Q}{3\varepsilon_0}$ **(3)** $\frac{Q}{4\varepsilon_0}$ **(4)** $\frac{Q}{2\varepsilon_0}$

23. Consider three point charges $-2Q$, Q and $-Q$ and three surfaces S_1, S_2 and S_3 as shown in the figure. Match the entries of List-I with that of List-II.

List-I	*List-II*
(a) Net flux through S_1	(i) $-2Q/\varepsilon_0$
(b) Net flux through S_2	(ii) $-Q/\varepsilon_0$
(c) Net flux through S_3	(iii) Zero

Codes:

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

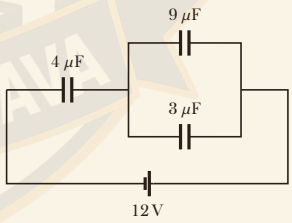

(1) a–ii, b–i, c–iii **(2)** a–iii, b–ii, c–i
(3) a–i, b–ii, c–iii **(4)** a–ii, b–iii, c–i

24. A parallel plate capacitor has a uniform electric field 'E' in the space between the plates. If the distance between the plates is 'd' and area of each plate is 'A', the energy stored in the capacitor is

DIRECT Class XII Part 1 · Ch 2 · **Page 75** Open PDF ↗

(1) $\frac{1}{2}\epsilon_0 E^2$ **(2)** $\epsilon_0 EAd$
(3) $\frac{1}{2}\epsilon_0 E^2 Ad$ **(4)** $\frac{E^2 Ad}{\epsilon_0}$

25. In the circuit shown in the figure, the potential difference across the 4 μF capacitor is

APPLIED Class XII Part 1 · Ch 2 · **Page 71** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(1) 3 V **(2)** 4 V **(3)** 9 V **(4)** 12 V

26. An electric dipole of dipole moment $\vec{P}$ is placed in the uniform electric field $\vec{E}$. Then which of the following statements are correct?
Statement I: The torque on the dipole is $\vec{P} \times \vec{E}$
Statement II: The potential energy of the dipole is $-\vec{P} \cdot \vec{E}$
Statement III: The net force on the dipole is non zero

DIRECT Class XII Part 1 · Ch 2 · **Page 60** Open PDF ↗

(1) I, II and III **(2)** I and II only
(3) II and III only **(4)** I and III only

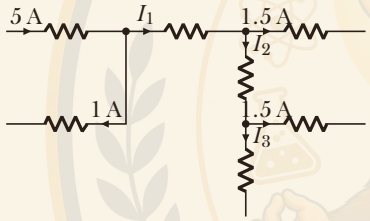

27. A 200 J of work is done in moving a charge 5 C from a point A where the potential is −20 V to another point B where potential is V volt. The value of V at B is

APPLIED Class XII Part 1 · Ch 2 · **Page 46** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(1) 10 V **(2)** 20 V **(3)** 40 V **(4)** 60 V

28. In the figure, the values of currents I_1, I_2 and I_3 respectively are

APPLIED Class XII Part 1 · Ch 3 · **Page 97** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(1) 6 A, 1.5 A and 1 A
(2) 4 A, 2.5 A and 2 A
(3) 4 A, 2.5 A and 1 A
(4) 6 A, 4.5 A and 1.5 A

29. The number of electrons moving per second through the filament of a lamp of 60 W operating at 120 V is nearly ($e = 1.6 \times 10^{-19}$ C) _____

APPLIED Class XII Part 1 · Ch 3 · **Page 82** Open PDF ↗

Similar PYQ: JEE Main 2024 (6 Apr, Shift 2) – electrons per second in a 110 W, 220 V filament

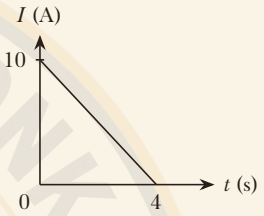

(1) 6.2×10^{18} **(2)** 6.2×10^{19}
(3) 3.1×10^{18} **(4)** 3.1×10^{19}

30. Given below are two statements:
Statement I: The resistivity of a conductor is independent of its temperature
Statement II: The resistivity of a semiconductor decreases with increase in temperature
Select the correct option.

DIRECT Class XII Part 1 · Ch 3 · **Page 90** Open PDF ↗

(1) Both Statement I and Statement II are false
(2) Both Statement I and Statement II are true
(3) Statement I is true but Statement II is false
(4) Statement I is false but Statement II is true

31. Current flowing through a wire decreases linearly from 10 A to zero in 4 s as shown in the graph. Find the total charge flowing through the wire in the given time interval.

APPLIED Class XII Part 1 · Ch 3 · **Page 82** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(1) 40 C **(2)** 20 C **(3)** 10 C **(4)** 80 C

32. In a conducting region, 10^{19} electrons and 10^{19} protons move to the left, while 10^{19} α-particles move to the right per second. The resulting electric current is ($e = 1.6 \times 10^{-19}$ C) _____

APPLIED Class XII Part 1 · Ch 3 · **Page 82** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(1) 3.2 A towards left **(2)** 3.2 A towards right
(3) 1.6 A towards left **(4)** 1.6 A towards right

33. A point charge is placed in a moving train. A passenger A sitting in the train and person B on the ground observe the fields due to this charge. Then

APPLIED Class XII Part 1 · Ch 4 · **Page 108** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(1) A observes both electric and magnetic fields
(2) B observes both electric and magnetic fields
(3) A observes only magnetic field
(4) B observes only electric field

34. A proton, an electron and an α-particle enter at right angles to a uniform magnetic field with the same velocity. If R_p, R_e and R_α are the radii of circular paths of these particles, then

APPLIED Class XII Part 1 · Ch 4 · **Page 112** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

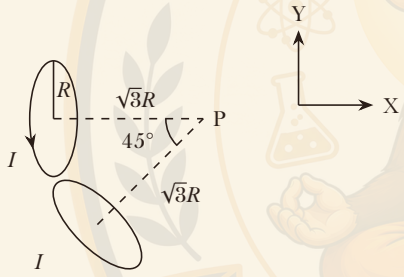

(1) $R_\alpha = R_p = R_e$ **(2)** $R_\alpha > R_p > R_e$
(3) $R_\alpha < R_p < R_e$ **(4)** $R_\alpha > R_p = R_e$

35. Biot–Savart law indicates that an electron moving with a velocity $\vec{V}$ produces a magnetic field $\vec{B}$ around it such that

DIRECT Class XII Part 1 · Ch 4 · **Page 113** Open PDF ↗

(1) $\vec{B}$ is parallel to $\vec{V}$
(2) $\vec{B}$ is perpendicular to $\vec{V}$
(3) $\vec{B}$ is anti-parallel to $\vec{V}$
(4) $\vec{B}$ is inclined to $\vec{V}$ by 45°

36. Two identical circular current loops carrying equal currents are placed with their axes inclined at 45° to each other as shown in the figure. The resultant magnetic field at P is

APPLIED Class XII Part 1 · Ch 4 · **Page 115** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(1) $\frac{\mu_0 I}{16\sqrt{2}R}\left[(\sqrt{2}+1)\hat{i}+\hat{j}\right]$
(2) $\frac{\mu_0 I}{16\sqrt{2}R}\left[\sqrt{2}\,\hat{i}+\hat{j}\right]$
(3) $\frac{\mu_0 I}{16R}\left[(\sqrt{2}+1)\hat{i}+\hat{j}\right]$
(4) $\frac{\mu_0 I}{16R}\left[\sqrt{2}\,\hat{i}+\hat{j}\right]$

37. If a paramagnetic bar is brought near a bar magnet, then it is

DIRECT Class XII Part 1 · Ch 5 · **Page 148** Open PDF ↗

(1) Attracted by both the poles of the bar magnet
(2) Repelled by both the poles of the bar magnet
(3) Attracted by the South-pole and repelled by the North-pole of the bar magnet
(4) Attracted by the North-pole and repelled by the South-pole of the bar magnet

38. Pick out the WRONG statements about magnetic substances (χ = magnetic susceptibility) (μ_r = relative permeability).

I. Substances with $-1 \le \chi < 0$ are diamagnetic
II. Substances with $\chi \gg 1$ are paramagnetic
III. Substances with $\chi \ll 1$ are ferromagnetic
IV. Substances with $\mu_r \gg 1$ are ferromagnetic

DIRECT Class XII Part 1 · Ch 5 · **Page 147** Open PDF ↗

(1) I and II **(2)** III and IV
(3) II and III **(4)** II and IV

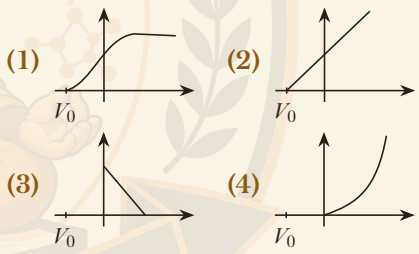

39. Work function of the metal is

DIRECT Class XII Part 2 · Ch 11 · **Page 275** Open PDF ↗

(1) Maximum possible energy acquired by an electron
(2) Equal for all metals
(3) Minimum energy required by an electron to just eject from metal surface
(4) Maximum energy which is given to electron to move out of metal surface

40. Variation of photoelectric current with anode potential is shown below. Choose the correct option (V_0 = stopping potential). (Vertical axis: photoelectric current; horizontal axis: anode potential.)

DIRECT Class XII Part 2 · Ch 11 · **Page 278** Open PDF ↗

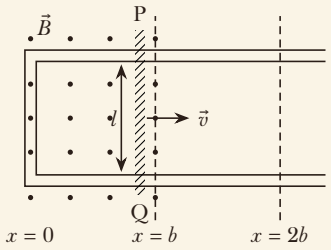

41. In Faraday–Henry's experiment, a coil is connected to a galvanometer. For the deflection of pointer in the galvanometer, which of the following statement/s is/are WRONG?
The pointer in the galvanometer deflects –
(a) When the bar magnet is moved towards the stationary coil along its axis
(b) When the bar magnet is moved away from the stationary coil along its axis
(c) When the coil is moved towards the stationary bar magnet along its axis
(d) When the coil and the magnet are moved without relative motion between them

DIRECT Class XII Part 1 · Ch 6 · **Page 155** Open PDF ↗

(1) a and b **(2)** b and c
(3) a, b and c **(4)** Only d

42. In the figure shown, the conductor PQ of length l is moved from $x = 0$ to $x = b$ and then up to $x = 2b$ with a constant velocity $\vec{v}$. A uniform magnetic field $\vec{B}$ is perpendicular to the plane of the paper and extends from $x = 0$ to $x = b$ and it is zero from $x > b$. The magnitude of emf induced in the conductor is

APPLIED Class XII Part 1 · Ch 6 · **Page 162** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(1) Blx ; $0 \le x < b$ **(2)** Zero ; $0 \le x < b$
(3) Blv ; $0 \le x \le b$ **(4)** Blv ; $b \le x < 2b$

43. In a circuit containing a pure resistor connected to an AC source,

DIRECT Class XII Part 1 · Ch 7 · **Page 178** Open PDF ↗

(1) Voltage leads the current by 90°
(2) Current leads the voltage by 90°
(3) Voltage and current are in same phase with each other
(4) Current leads the voltage by 180°

44. A light bulb rated 100 W is connected to an AC source of 220 V, 50 Hz. The rms current through the bulb is

DIRECT Class XII Part 1 · Ch 7 · **Page 180** Open PDF ↗

(1) 0.454 A **(2)** 0.545 A
(3) 2.20 A **(4)** 0.22 A

45. A small town with a demand of 900 kW of electric power at 220 V is situated 20 km away from an electric power generating station. The two-wire line has resistance per unit length of $5 \times 10^{-4}\ \Omega\ m^{-1}$. The town gets power from the line through 45000 V to 220 V step-down transformer at a substation in the town. The line power loss in the form of heat is

APPLIED Class XII Part 1 · Ch 3 · **Page 93** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(1) 4 kW **(2)** 8 kW **(3)** 40 kW **(4)** 80 kW

46. Match the following Maxwell's equations: (The symbols used here have their usual meanings)

List-I
(a) Gauss' law for electrostatics (b) Gauss' law for magne
(c) Faraday's law (d) Ampere–Maxwell's la

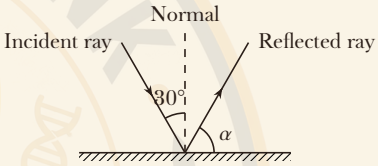

List-II
(i) $\oint \vec{E} \cdot d\vec{A} = \frac{Q}{\varepsilon_0}$
(ii) $\oint \vec{B} \cdot d\vec{l} = \mu_0 \left[i_c + \varepsilon_0 \frac{d\phi_E}{dt} \right]$
(iii) $\oint \vec{B} \cdot d\vec{A} = 0$
(iv) $\oint \vec{E} \cdot d\vec{l} = -\frac{d\phi_B}{dt}$

Codes:

KCET 2026 · Paper Analysis

1. Direct vs Applied

Direct from NCERT textbook (2026-27)	21
Direct from NCERT Exemplar	2
Applied (concept in NCERT)	37
Total	**60**

Direct: Q 5, 9, 16, 17, 20, 21, 24, 26, 30, 35, 37, 38, 39, 40, 41, 43, 44, 46, 51, 54, 56.

Exemplar: Q 22, 48.

2. Where the applied questions resemble earlier exams

Of the 37 applied questions, **15** closely resemble a question from an earlier national exam: NEET/AIPMT 4, JEE Main 7, AIEEE 4. The other 22 (Q 3, 8, 12, 18, 23, 25, 27, 28, 31, 32, 33, 34, 36, 42, 45, 47, 49, 50, 52, 53, 58, 60) had no close match in the NEET, AIPMT, AIIMS, AIEEE and JEE papers of 2005–2026 that were searched; they are straightforward applications of NCERT concepts.

Strongest repeats: Q15 (AIEEE 2005, same capillary set-up), Q19 (NEET 2013, same beats structure), Q57 (AIEEE 2006, same diode figure type), Q10 and Q29 (JEE Main 2024), Q2 and Q13 (NEET 2023).

3. Difficulty level

Easy	33
Moderate	25
Hard	2

Hard: Q36 (resultant field of two inclined loops), Q45 (power-line loss). Overall: **easy to moderate.** About two-thirds of the paper can be answered straight from NCERT text, examples and formulae; the rest needs one or two steps of application. Class XI: 20 questions, Class XII: 40.

4. Chapter-wise distribution

Chapter	Cl.	Qs	Dir	App
Units & Measurement	XI	1	0	1
Motion in a Straight Line	XI	2	0	2
Motion in a Plane	XI	1	0	1
Laws of Motion	XI	2	1	1
Work, Energy & Power	XI	2	0	2
Rotational Motion	XI	2	1	1
Gravitation	XI	2	0	2
Mech. Prop. of Solids	XI	1	0	1
Mech. Prop. of Fluids	XI	2	0	2
Thermodynamics	XI	3	3	0
Oscillations	XI	1	0	1
Waves	XI	1	0	1
Electric Charges & Fields	XII	3	2	1
Electrostatic Potential & Capacitance	XII	4	2	2
Current Electricity	XII	7	1	6
Moving Charges & Magnetism	XII	4	1	3
Magnetism & Matter	XII	2	2	0
Electromagnetic Induction	XII	2	1	1
Alternating Current	XII	2	2	0
Electromagnetic Waves	XII	2	2	0
Ray Optics	XII	5	1	4
Wave Optics	XII	1	0	1
Dual Nature	XII	2	2	0
Atoms	XII	3	1	2
Semiconductor Electronics	XII	3	1	2

5. Teaching takeaways

- Read NCERT text line by line: lists such as irreversible processes (p. 236), Table 5.2 (p. 147) and Bohr's postulates (p. 299) were asked almost verbatim.
- Solved NCERT examples reappear with the same data (Example 1.7, Example 7.1).
- NCERT Exemplar is worth practising (Q22, Q48 identical).
- Old NEET/AIEEE PYQs on beats, capillarity and diodes recur with new numbers.

KCET 2025 · Paper Analysis

1. Direct vs Applied

Direct from NCERT textbook (2026-27)	20
Direct from NCERT Exemplar	0
Applied (concept in NCERT)	40
Total	**60**

Direct: Q 3, 8, 11, 12, 16, 19, 25, 26, 29, 32, 35, 36, 40, 42, 45, 48, 53, 54, 55, 56.

2. Where the applied questions resemble earlier exams

Of the 40 applied questions, **14** closely resemble a question from an earlier national exam: NEET/AIPMT/AIIMS 9, JEE Main/Advanced 7, AIEEE 0. The other 26 (Q 1, 2, 4, 5, 6, 7, 9, 10, 17, 20, 22, 23, 24, 28, 31, 33, 34, 39, 43, 44, 46, 50, 51, 52, 58, 60) had no close match in the NEET, AIPMT, AIIMS, AIEEE and JEE papers of 2005–2026 that were searched; they are straightforward applications of NCERT concepts.

Strongest repeats: Q47 (JEE Main 2022, identical wording), Q30 (AIPMT 2015), Q57 (AIPMT 2012), Q59 (JEE Main 2014), Q15 (NEET 2025), Q27 (NEET 2024).

3. Difficulty level

Easy	34
Moderate	26
Hard	0

Overall: **easy to moderate**, slightly easier than 2026; many single-formula questions. The last three questions are practical-based (travelling microscope, half-deflection, viscosity). Class XI: 20 questions, Class XII: 40. (Difficulty is the editor's assessment.)

4. Chapter-wise distribution

Chapter	Cl.	Qs	Dir	App
Units & Measurement	XI	1	0	1
Motion in a Straight Line	XI	1	0	1
Motion in a Plane	XI	1	0	1
Laws of Motion	XI	3	1	2

Nuclei	XII	2	2	0
Semiconductor Electronics	XII	3	2	1

5. Teaching takeaways

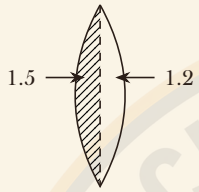

- NCERT statements are asked directly: Bohr's and nuclear-force lists (p. 299, p. 313), Table 8.1 wavelength ranges (p. 211), resistivity ranges (p. 90, p. 324).
- NCERT Example 7.1 (perihelion/aphelion) and the Faraday experiments (p. 155) were asked again, as in 2026.
- Three questions come from the Class XII lab manual; revise practical procedures and their calculations.
- Q47 repeats a JEE Main 2022 question word for word; JEE Main and NEET PYQs are useful practice.

KCET 2024 · Paper Analysis

1. Direct vs Applied

Direct from NCERT textbook (2026-27)	10
Direct from NCERT Exemplar	0
Applied (concept in NCERT)	50
Total	**60**

Direct: Q 12, 13, 21, 28, 29, 32, 35, 38, 44, 58.

2. Where the applied questions resemble earlier exams

Of the 50 applied questions, **13** closely resemble a question from an earlier national exam: NEET/AIPMT/AIIMS 6, JEE Main/Advanced 7, AIEEE 0. The other 37 (Q 1, 2, 5, 6, 8, 9, 10, 11, 15, 16, 17, 18, 19, 20, 22, 25, 26, 27, 31, 33, 36, 37, 39, 40, 41, 42, 43, 46, 47, 48, 49, 50, 51, 52, 53, 55, 56) had no close match in the NEET, AIPMT, AIIMS, AIEEE and JEE papers of 2005–2026 that were searched; they are straightforward applications of NCERT concepts. **9** questions (Q 2, 11, 14, 18, 30, 48, 49, 54, 57) test topics no longer in the 2026-27 NCERT textbook.

Strongest repeats: Q54 (NEET 2016 Phase II, identical wording), Q45 (JEE Main 2023), Q23 (NEET 2020), Q34 (NEET 2019), Q57 (NEET 2014), Q3 (NEET 2017).

3. Difficulty level

Easy	40
Moderate	20
Hard	0

Overall: **easy**, the easiest of 2024–2026; most questions need one formula or one NCERT statement. The paper opens with Optics, Modern Physics and Semiconductors (Q1–15). Class XI: 15 questions, Class XII: 45. (Difficulty is the editor's assessment.)

4. Chapter-wise distribution

Chapter	Cl.	Qs	Dir	App
Units & Measurement	XI	1	0	1

Semiconductor Electronics	XII	4	2	2

5. Teaching takeaways

- Nine questions test topics removed from the rationalised NCERT (Doppler effect, radioactive decay, Zener diode, hysteresis, Curie's law, Q-factor, radiation pressure); KCET still asks them, so teach these from the old syllabus.
- NCERT Table 12.1 (γ values, p. 254), the band picture of metals (p. 326) and the depletion layer (p. 333) are asked as direct statements.
- Q43 (meter bridge, temperature coefficient) comes from the Class XII lab manual.
- Q54 repeats NEET 2016 Phase II word for word; NEET PYQs are worth practising.

KCET 2023 · Paper Analysis

1. Direct vs Applied

Direct from NCERT textbook (2026-27)	9
Direct from NCERT Exemplar	0
Applied (concept in NCERT)	51
Total	**60**

Direct: Q 10, 17, 22, 38, 43, 44, 53, 55, 56.

2. Where the applied questions resemble earlier exams

Of the 51 applied questions, **12** closely resemble a question from an earlier national exam: NEET/AIPMT/AIIMS 9, JEE Main/Advanced 3, AIEEE 0. The other 39 (Q 1, 3, 4, 5, 7, 8, 11, 12, 13, 14, 15, 16, 18, 19, 20, 21, 23, 25, 26, 27, 28, 29, 30, 31, 32, 33, 35, 36, 39, 45, 46, 48, 50, 51, 52, 54, 58, 59, 60) had no close match in the NEET, AIPMT, AIIMS, AIEEE and JEE papers of 2005–2026 that were searched; they are straightforward applications of NCERT concepts. **14** questions (Q 3, 4, 5, 6, 7, 12, 20, 33, 34, 35, 37, 39, 42, 52) test topics no longer in the 2026-27 NCERT textbook.

Strongest repeats: Q6 (AIIMS 2009), Q9 (AIPMT 2015), Q49 (AIIMS 2008), Q57 (AIPMT 2005), Q47 (JEE Main 2024), Q2 (NEET 2025).

3. Difficulty level

Easy	32
Moderate	25
Hard	3

Hard: Q 11, 21, 42. Overall: **moderate**, harder than 2024; Q11 (seven discs), Q21 (force and torque from a dipole) and Q42 (particle after the electric field is switched off) need several steps. Class XI: 15 questions, Class XII: 45. (Difficulty is the editor's assessment.)

4. Chapter-wise distribution

Chapter	Cl.	Qs	Dir	App
Units & Measurement	XI	1	0	1
Motion in a Straight Line	XI	1	0	1

Semiconductor Electronics	XII	3	0	3

5. Teaching takeaways

- Fourteen questions test topics removed from the rationalised NCERT (logic gates, LED, α/β decay, half-life, colour code, cyclotron, Curie–Weiss law, dip, velocity selector, Q-factor); KCET 2023 still followed the older syllabus for these.
- Statements asked directly: moment of inertia depends on the axis (p. 115), $E_0/B_0 = c$ (p. 212), slope h/e of the V_0–ν graph (p. 282), zero phase at resonance (p. 189).
- Q34–35 (colour code) and Q41 (galvanometer to ammeter) come from the Class XII lab manual.
- AIPMT/AIIMS questions from 2005–2015 reappear (Q6, Q9, Q49, Q57); older PYQs are still worth practising.

KCET 2022
Physics Question Paper

Version D-1 · 60 Questions · 60 Marks · 80 Minutes

1. In case of Fraunhoffer diffraction at a single slit the diffraction pattern on the screen is correct for which of the following statements?

DIRECT Class XII Part 2 · Ch 10 · **Page 267** Open PDF ↗

(A) Central dark band having uniform brightness on either side.
(B) Central dark band having alternate dark and bright bands of decreasing intensity on either side.
(C) Central bright band having dark bands on either side.
(D) Central bright band having alternate dark and bright bands of decreasing intensity on either side.

2. When a Compact Disc (CD) is illuminated by small source of white light coloured bands are observed. This is due to

DIRECT Class XII Part 2 · Ch 10 · **Page 267** Open PDF ↗

(A) Interference **(B)** Scattering
(C) Reflection **(D)** Diffraction

3. Consider a glass slab which is silvered at one side and the other side is transparent. Given the refractive index of the glass slab to be 1.5. If a ray of light is incident at an angle of 45° on the transparent side, the deviation of the ray of light from its initial path, when it comes out of the slab is

APPLIED Class XII Part 2 · Ch 9 · **Page 228** Open PDF ↗

(A) 0 **(B)** $\frac{\pi}{6}$ **(C)** $\frac{\pi}{3}$ **(D)** $\frac{\pi}{4}$

25. A tiny spherical oil drop carrying a net charge q is balanced in still air, with a vertical uniform electric field of strength $\frac{81}{7}\pi \times 10^5$ V/m. When the field is switched off, the drop is observed to fall with terminal velocity 2×10^{-3} m s^{-1}. Here $g = 9.8$ m/s^2, viscosity of air is 1.8×10^{-5} N s/m^2 and the density of oil is 900 kg m^{-3}. The magnitude of 'q' is

APPLIED Class XI Part 2 · Ch 9 · **Page 192** Open PDF ↗

Similar PYQ: IIT-JEE 2010 (Paper II) – same question: oil drop balanced in a field of $\frac{81}{7}\pi \times 10^5$ V/m, terminal velocity

(A) 1.6×10^{-19} C **(B)** 0.8×10^{-19} C
(C) 3.2×10^{-19} C **(D)** 8×10^{-19} C

26. "Heat cannot be itself flow from a body at lower temperature to a body at higher temperature". This statement corresponds to

DIRECT Class XI Part 2 · Ch 11 · **Page 241** Open PDF ↗

(A) Conservation of mass
(B) Second law of Thermodynamics
(C) First law of thermodynamics
(D) Conservation of momentum

27. A smooth chain of length 2 m is kept on a table such that its length of 60 cm hangs freely from the edge of the table. The total mass of the chain is 4 kg. The work done in pulling the entire chain on the table is, (Take $g = 10$ m/s^2)

APPLIED Class XI Part 1 · Ch 5 · **Page 75** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) 3.6 J **(B)** 12.9 J **(C)** 2.0 J **(D)** 6.3 J

28. The angular speed of a motor wheel is increased from 1200 rpm to 3120 rpm in 16 seconds. The angular acceleration of the motor wheel is

APPLIED Class XI Part 1 · Ch 6 · **Page 105** Open PDF ↗

Similar PYQ: NEET 2022 – same question: flywheel from 1200 rpm to 3120 rpm in 16 s

(A) 6π rad/s^2 **(B)** 2π rad/s^2
(C) 8π rad/s^2 **(D)** 4π rad/s^2

29. The centre of mass of an extended body on the surface of the earth and its centre of gravity

DIRECT Class XI Part 1 · Ch 6 · **Page 113** Open PDF ↗

(A) can never be at the same point.
(B) are always at the same point for any size of the body.
(C) centre of mass coincides with the centre of gravity of a body if the size of the body is negligible as compared to the size (or radius) of the earth.
(D) are always at the same point only for spherical bodies.

30. A metallic rod breaks when strain produced is 0.2%. The Young's modulus of the material of the rod is 7×10^9 N/m^2. The area of cross section to support a load of 10^4 N is

APPLIED Class XI Part 2 · Ch 8 · **Page 171** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) 7.1×10^{-4} m^2 **(B)** 7.1×10^{-8} m^2
(C) 7.1×10^{-2} m^2 **(D)** 7.1×10^{-6} m^2

31. A charged particle of mass 'm' and charge 'q' is released from rest in an uniform electric field $\vec{E}$. Neglecting the effect of gravity, the kinetic energy of the charged particle after 't' second is

APPLIED Class XII Part 1 · Ch 1 · **Page 16** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) $\frac{Eqm}{t}$ **(B)** $\frac{2E^2t^2}{mq}$
(C) $\frac{E^2q^2t^2}{2m}$ **(D)** $\frac{Eq^2m}{2t^2}$

32. The electric field and the potential of an electric dipole vary with distance r as

DIRECT Class XII Part 1 · Ch 2 · **Page 49** Open PDF ↗

(A) $\frac{1}{r^2}$ and $\frac{1}{r^3}$ **(B)** $\frac{1}{r}$ and $\frac{1}{r^2}$
(C) $\frac{1}{r^3}$ and $\frac{1}{r^2}$ **(D)** $\frac{1}{r^2}$ and $\frac{1}{r}$

33. The displacement of a particle executing SHM is given by $x = 3\sin\left[2\pi t + \frac{\pi}{4}\right]$ where 'x' is in metres and 't' is in seconds. The amplitude and maximum speed of the particle is

APPLIED Class XI Part 2 · Ch 13 · **Page 266** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) 3 m, 6π m s^{-1} **(B)** 3 m, 2π m s^{-1}
(C) 3 m, 8π m s^{-1} **(D)** 3 m, 4π m s^{-1}

34. Electrical as well as gravitational affects can be thought to be caused by fields. Which of the following is true for an electrical or gravitational field?

DIRECT Class XII Part 1 · Ch 1 · **Page 17** Open PDF ↗

(A) Fields are useful for understanding forces acting through a distance.
(B) The field concept is often used to describe contact forces.
(C) There is no way to verify the existence of a force field since it is just a concept.
(D) Gravitational or Electric field does not exist in the space around an object.

35. Four charges $+q$, $+2q$, $+q$ and $-2q$ are placed at the corners of a square ABCD respectively. The force on a unit positive charge kept at the centre 'O' is

APPLIED Class XII Part 1 · Ch 1 · **Page 12** Open PDF ↗

Similar PYQ: AIIMS 2009 – four charges at the corners of a square, field/force at the centre

(A) along the diagonal AC
(B) zero
(C) perpendicular to AD
(D) along the diagonal BD

36. An electric dipole with dipole moment 4×10^{-9} C m is aligned at 30° with the direction of a uniform electric field of magnitude 5×10^4 N C^{-1}, the magnitude of the torque acting on the dipole is

APPLIED Class XII Part 1 · Ch 1 · **Page 27** Open PDF ↗

Similar PYQ: NEET 2023 – electric dipole at an angle to a uniform field, torque

(A) 10^{-5} N m **(B)** 10^{-4} N m
(C) 10×10^{-3} N m **(D)** $\sqrt{3} \times 10^{-4}$ N m

37. Ten identical cells each of potential 'E' and internal resistance 'r', are connected in series to form a closed circuit. An ideal voltmeter connected across three cells, will read

APPLIED Class XII Part 1 · Ch 3 · **Page 96** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) $13E$ **(B)** $10E$ **(C)** $7E$ **(D)** $3E$

38. In an atom electrons revolve around the nucleus along a path of radius 0.72 Å making 9.4×10^{18} revolutions per second. The equivalent current is – [given $e = 1.6 \times 10^{-19}$ C]

KCET 2022 · Paper Analysis

1. Direct vs Applied

Direct from NCERT textbook (2026-27)	12
Direct from NCERT Exemplar	0
Applied (concept in NCERT)	48
Total	**60**

Direct: Q 1, 2, 5, 7, 18, 19, 26, 29, 32, 34, 43, 59.

2. Where the applied questions resemble earlier exams

Of the 48 applied questions, **11** closely resemble a question from an earlier national exam: NEET/AIPMT/AIIMS 7, JEE Main/Advanced 3, AIEEE 1. The other 37 (Q 3, 4, 6, 8, 9, 10, 11, 12, 13, 14, 15, 17, 20, 22, 23, 24, 27, 30, 31, 33, 37, 38, 39, 40, 41, 42, 45, 47, 48, 50, 51, 54, 55, 56, 57, 58, 60) had no close match in the NEET, AIPMT, AIIMS, AIEEE and JEE papers of 2005–2026 that were searched; they are straightforward applications of NCERT concepts. 5 questions (Q 14, 17, 21, 51, 53) test topics no longer in the 2026-27 NCERT textbook.

Strongest repeats: Seven questions repeat earlier papers almost word for word: Q25 (IIT-JEE 2010), Q28 (NEET 2022), Q44 (AIPMT 2008), Q46 (AIPMT 2012), Q49 (NEET 2020), Q52 (AIPMT 2008), Q53 (AIEEE 2011).

3. Difficulty level

Easy	38
Moderate	21
Hard	1

Hard: Q 25. Overall: **easy to moderate**; mostly one-formula questions. Q25 (Millikan oil drop with Stokes' law) is the longest calculation. Class XI: 12 questions, Class XII: 48. (Difficulty is the editor's assessment.)

4. Chapter-wise distribution

Chapter	Cl.	Qs	Dir	App
Units & Measurement	XI	1	0	1
Motion in a Straight Line	XI	1	0	1
Motion in a Plane	XI	1	0	1
Laws of Motion	XI	2	0	2
Work, Energy & Power	XI	1	0	1
Rotational Motion	XI	2	1	1
Mech. Prop. of Solids	XI	1	0	1
Mech. Prop. of Fluids	XI	1	0	1
Thermodynamics	XI	1	1	0
Oscillations	XI	1	0	1
Electric Charges & Fields	XII	4	1	3
Electrostatic Potential & Capacitance	XII	3	1	2
Current Electricity	XII	7	1	6
Moving Charges & Magnetism	XII	5	0	5
Magnetism & Matter	XII	1	0	1
Electromagnetic Induction	XII	2	0	2
Alternating Current	XII	4	0	4
Electromagnetic Waves	XII	1	1	0
Ray Optics	XII	5	0	5
Wave Optics	XII	4	3	1
Dual Nature	XII	3	0	3
Atoms	XII	3	1	2
Nuclei	XII	3	0	3
Semiconductor Electronics	XII	3	2	1

5. Teaching takeaways

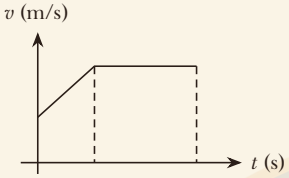

- KCET 2022 borrowed heavily from AIPMT/AIEEE papers of 2008–2012; practise those PYQs.
- Direct NCERT lines: CD colours and single-slit pattern (p. 267), wire-bound resistors (p. 90), resistivity and energy-gap values (p. 324, p. 332), the Chapter 12 exercise on Bohr's model for the Earth (p. 305).
- Five questions are on topics removed from the rationalised NCERT (logic gates, radioactivity, Earth's magnetism, LC oscillations, vernier).
- Q21 (travelling microscope) and Q39 (meter bridge) come from the Class XII lab manual.

KCET 2021 · Paper Analysis

1. Direct vs Applied

Direct from NCERT textbook (2026-27)	11
Direct from NCERT Exemplar	0
Applied (concept in NCERT)	49
Total	**60**

Direct: Q 4, 13, 17, 19, 23, 29, 42, 48, 52, 56, 59.

2. Where the applied questions resemble earlier exams

Of the 49 applied questions, **3** closely resemble a question from an earlier national exam: NEET/AIPMT/AIIMS 2, JEE Main/Advanced 1, AIEEE 0. The other 46 (Q 1, 2, 3, 5, 6, 7, 8, 9, 10, 11, 12, 14, 15, 16, 18, 20, 21, 22, 25, 27, 28, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 43, 44, 45, 46, 49, 50, 51, 53, 54, 55, 57, 58, 60) had no close match in the NEET, AIPMT, AIIMS, AIEEE and JEE papers of 2005–2026 that were searched; they are straightforward applications of NCERT concepts. **9** questions (Q 8, 10, 32, 34, 39, 40, 57, 58, 60) test topics no longer in the 2026-27 NCERT textbook.

Strongest repeats: Q24 (JEE Main 2017, capacitor grouping), Q26 (NEET 2013), Q47 (NEET 2016).

3. Difficulty level

Easy	36
Moderate	21
Hard	3

Hard: Q 33, 46, 51. Overall: **moderate**; the paper follows the NCERT textbook closely and has very few PYQ repeats. Q33 (charged particle inside a solenoid), Q46 (convex–concave lens system) and Q51 (proton and photon momenta) are the hardest. Class XI: 17 questions, Class XII: 43. (Difficulty is the editor's assessment.)

4. Chapter-wise distribution

Chapter	Cl.	Qs	Dir	App

Dual Nature	XII	3	1	2
Atoms	XII	3	0	3
Nuclei	XII	2	1	1
Semiconductor Electronics	XII	3	1	2

5. Teaching takeaways

- NCERT statements asked directly: projectile path is a parabola (p. 39), $\alpha_V = 1/T$ for an ideal gas (p. 206), transverse waves need shear modulus (p. 281), energy dissipated $IV\Delta t$ (p. 92), accelerated charges radiate (p. 205), nuclear potential-energy curve (p. 313).
- Nine questions are on topics removed from the rationalised NCERT (restitution, rolling, toroid, Earth's magnetism, LC oscillations, reactor, logic gates, photodiode).
- Only three questions resemble earlier national papers; KCET 2021 relied on NCERT ideas rather than PYQs.
- Q27 (meter bridge, wire radius doubled) is a lab-manual question.

KCET 2020 · Paper Analysis

1. Direct vs Applied

Direct from NCERT textbook (2026-27)	8
Direct from NCERT Exemplar	3
Applied (concept in NCERT)	49
Total	**60**

Direct: Q 19, 25, 39, 47, 48, 53, 58, 59.

Exemplar: Q 5, 30, 37.

2. Where the applied questions resemble earlier exams

Of the 49 applied questions, **6** closely resemble a question from an earlier national exam: NEET/AIPMT/AIIMS 4, JEE Main/Advanced 2, AIEEE 0. The other 43 (Q 1, 2, 3, 4, 6, 7, 8, 9, 11, 12, 13, 14, 15, 16, 17, 18, 20, 21, 22, 23, 24, 26, 27, 29, 31, 32, 33, 34, 35, 40, 41, 42, 43, 45, 46, 49, 50, 51, 52, 54, 55, 57, 60) had no close match in the NEET, AIPMT, AIIMS, AIEEE and JEE papers of 2005–2026 that were searched; they are straightforward applications of NCERT concepts. **12** questions (Q 9, 20, 21, 27, 28, 36, 41, 49, 50, 52, 55, 56) test topics no longer in the 2026-27 NCERT textbook.

Strongest repeats: Q38 (AIPMT 2015, identical), Q56 (NEET 2017, identical), Q28 (JEE Main 2020, same pattern), Q36 (NEET 2020), Q44 (AIPMT 2009), Q10 (JEE Main 2021).

3. Difficulty level

Easy	35
Moderate	24
Hard	1

Hard: Q 24. Overall: **easy to moderate**; Q24 (field at O due to straight and curved parts) is the only lengthy calculation. Class XI: 15 questions, Class XII: 45. (Difficulty is the editor's assessment.)

4. Chapter-wise distribution

Chapter	Cl.	Qs	Dir	App
Units & Measurement	XI	1	0	1
Motion in a Straight Line	XI	1	0	1
Motion in a Plane	XI	1	0	1
Laws of Motion	XI	1	1	0
Work, Energy & Power	XI	1	1	0
Rotational Motion	XI	2	0	2
Gravitation	XI	1	0	1
Mech. Prop. of Solids	XI	1	0	1
Mech. Prop. of Fluids	XI	1	0	1
Thermal Prop. of Matter	XI	1	1	0
Thermodynamics	XI	2	0	2
Oscillations	XI	1	0	1
Waves	XI	1	0	1
Electric Charges & Fields	XII	4	0	4
Electrostatic Potential & Capacitance	XII	4	0	4
Current Electricity	XII	6	1	5
Moving Charges & Magnetism	XII	6	1	5
Magnetism & Matter	XII	2	1	1
Electromagnetic Induction	XII	2	0	2
Alternating Current	XII	3	0	3
Electromagnetic Waves	XII	1	0	1
Ray Optics	XII	3	2	1
Wave Optics	XII	3	0	3
Dual Nature	XII	1	0	1
Atoms	XII	4	1	3
Nuclei	XII	3	1	2
Semiconductor Electronics	XII	3	1	2

5. Teaching takeaways

- Several questions are NCERT exercises or Exemplar problems used as they stand: Q58 and Q59 (Class XI exercises, p. 69, p. 90), Q39 (converging beam, p. 249), Q5 (Exemplar XI 11.8), Q37 (Exemplar XII 9.3), Q30 (Exemplar XII 5.3).
- Twelve questions are on topics removed from the rationalised NCERT (Doppler, potentiometer, colour code, cyclotron, Curie's law, radiation pressure, resolving power, decay, logic gates, errors, relative velocity).
- NEET PYQs reappear almost word for word (Q38 AIPMT 2015, Q56 NEET 2017).
- Q20 (potentiometer) and Q21 (colour code) are lab-manual questions.

KCET 2019
Physics Question Paper

Version A-1 · 60 Questions · 60 Marks · 80 Minutes

1. In a cyclotron a charged particle

DIRECT Class XII Part 1 · Ch 4 · **Page 112** · Exemplar Q4.5 Open PDF ↗

(A) undergoes acceleration all the time
(B) speeds up between the dees because of the magnetic field.
(C) speeds up in dee
(D) slows down within a dee and speeds up between dees

2. The number of turns in a coil of Galvanometer is tripled, then

APPLIED Class XII Part 1 · Ch 4 · **Page 131** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) Voltage sensitivity increases 3 times and current sensitivity remains constant
(B) Voltage sensitivity remains constant and current sensitivity increases 3 times
(C) Both voltage and current sensitivity remains constant
(D) Both voltage and current sensitivity decreases by 33%

3. A circular current loop of magnetic moment M is in an arbitrary orientation in an external uniform magnetic field $\vec{B}$. The work done to rotate the loop by 30° about an axis perpendicular to its plane is

DIRECT Class XII Part 1 · Ch 4 · **Page 124** · Exemplar Q4.6 Open PDF ↗

(A) MB **(B)** $\sqrt{3}\,\frac{MB}{2}$
(C) $\frac{MB}{2}$ **(D)** Zero

4. In a permanent magnet at room temperature

DIRECT Class XII Part 1 · Ch 5 · **Page 149** · Exemplar Q5.3 Open PDF ↗

(A) magnetic moment of each molecule is zero.
(B) the individual molecules have non zero magnetic moment which are all perfectly aligned.
(C) domains are partially aligned.
(D) domains are all perfectly aligned.

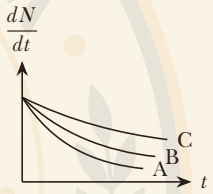

5. Coersivity of a magnet where the ferromagnet gets completely demagnetized is $3 \times 10^3\ \mathrm{A\,m^{-1}}$. The minimum current required to be passed in a solenoid having 1000 turns per metre, so that the magnet gets completely demagnetized when placed inside the solenoid is

APPLIED Class XII Part 1 · Ch 5 · **Page 149** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026. *Note: coercivity (hysteresis) is not in the 2026-27 NCERT textbook.*

(A) 30 mA **(B)** 60 mA **(C)** 3 A **(D)** 6 A

6. Which one of the following nuclei has shorter mean life?

APPLIED Class XII Part 2 · Ch 13 · **Page 314** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026. *Note: the radioactive decay law (mean life) is not in the 2026-27 NCERT textbook.*

(A) A **(B)** B
(C) C **(D)** Same for all

7. The conductivity of semiconductor increases with increase in temperature because

DIRECT Class XII Part 2 · Ch 14 · **Page 329** · Exemplar Q14.1 Open PDF ↗

(A) number density of charge carriers increases
(B) relaxation time increases
(C) both number density of charge carriers and relaxation time increase
(D) number density of current carriers increases, relaxation time decreases but effect of decrease in relaxation time is much less than increase in number density

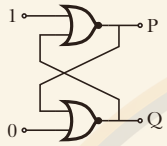

8. For a transistor amplifier, the voltage gain

APPLIED Class XII Part 2 · Ch 14 · **Page 323** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026. *Note: the transistor amplifier is not in the 2026-27 NCERT textbook.*

(A) remains constant for all frequencies
(B) is high at high and low frequencies and constant in the middle frequency range
(C) is low at high and low frequencies and constant at mid frequencies
(D) constant at high frequencies and low at low frequencies

9. In the following circuit, what are P and Q?

APPLIED Class XII Part 2 · Ch 14 · **Page 323** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026. *Note: digital electronics (logic gates) is not in the 2026-27 NCERT textbook.*

(A) $P = 0, Q = 0$ **(B)** $P = 1, Q = 0$
(C) $P = 0, Q = 1$ **(D)** $P = 1, Q = 1$

10. An antenna uses electromagnetic waves of frequency 5 MHz. For proper working, the size of the antenna should be

APPLIED Class XII Part 1 · Ch 8 · **Page 209** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026. *Note: antenna size (communication systems) is not in the 2026-27 NCERT textbook.*

(A) 15 m **(B)** 300 m **(C)** 15 km **(D)** 3 km

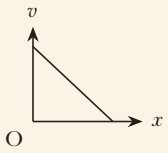

11. If P, Q and R are physical quantities having different dimensions, which of the following combinations can never be a meaningful quantity?

APPLIED Class XI Part 1 · Ch 1 · **Page 8** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) $\frac{P-Q}{R}$ **(B)** $PQ - R$
(C) $\frac{PQ}{R}$ **(D)** $\frac{PR - Q^2}{R}$

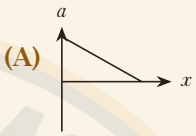

12. The given graph shows the variation of velocity (v) with position (x) for a particle moving along a straight line

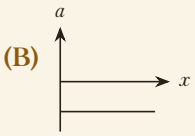

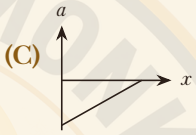

Which of the following graph shows the variation of acceleration (a) with position (x)?

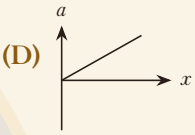

APPLIED Class XI Part 1 · Ch 2 · **Page 16** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) 

(B) 

(C) 

(D) 

13. The trajectory of a projectile projected from origin is given by the equation $y = x - \frac{2x^2}{5}$. The initial velocity of the projectile is

APPLIED Class XI Part 1 · Ch 3 · **Page 39** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) $\frac{2}{5}\ \text{m s}^{-1}$ **(B)** $5\ \text{m s}^{-1}$
(C) $25\ \text{m s}^{-1}$ **(D)** $\frac{5}{2}\ \text{m s}^{-1}$

14. An object with mass 5 kg is acted upon by a force, $\vec{F} = (-3\hat{i} + 4\hat{j})$ N. If its initial velocity at $t = 0$ is $\vec{v} = (6\hat{i} - 12\hat{j})\ \text{m s}^{-1}$, the time at which it will just have a velocity along y-axis is

APPLIED Class XI Part 1 · Ch 4 · **Page 53** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) 5 s **(B)** 10 s **(C)** 2 s **(D)** 15 s

15. During inelastic collision between two objects, which of the following quantity always remains conserved?

DIRECT Class XI Part 1 · Ch 5 · **Page 84** Open PDF ↗

(A) Total kinetic energy
(B) Total mechanical energy
(C) Total linear momentum
(D) Speed of each body

16. In Rutherford experiment, for head-on collision of α-particles with a gold nucleus, the impact parameter is

DIRECT Class XII Part 2 · Ch 12 · **Page 294** Open PDF ↗

(A) zero
(B) of the order of 10^{-14} m
(C) of the order of 10^{-10} m
(D) of the order of 10^{-6} m

17. Frequency of revolution of an electron revolving in n^{th} orbit of H-atom is proportional to

APPLIED Class XII Part 2 · Ch 12 · **Page 299** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) $\frac{1}{n^2}$ **(B)** n
(C) n independent of n **(D)** $\frac{1}{n^3}$

18. A hydrogen atom in ground state absorbs 10.2 eV of energy. The orbital angular momentum of the electron is increased by

APPLIED Class XII Part 2 · Ch 12 · **Page 300** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) 1.05×10^{-34} J s **(B)** 2.11×10^{-34} J s
(C) 3.16×10^{-34} J s **(D)** 4.22×10^{-34} J s

19. The end product of decay of ${}_{90}\text{Th}^{232}$ is ${}_{82}\text{Pb}^{208}$. The number of α and β particles emitted are respectively

APPLIED Class XII Part 2 · Ch 13 · **Page 314** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026. *Note: α- and β-decay is not in the 2026-27 NCERT textbook.*

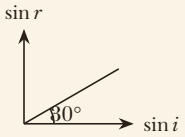

(A) 3, 3 **(B)** 6, 4 **(C)** 6, 0 **(D)** 4, 6

20. Two protons are kept at a separation of 10 nm. Let F_n and F_e be the nuclear force and the electromagnetic force between them

DIRECT Class XII Part 2 · Ch 13 · **Page 313** Open PDF ↗

(A) $F_e = F_n$
(B) $F_e \gg F_n$
(C) $F_e \ll F_n$
(D) F_e and F_n differ only slightly

21. A transparent medium shows relation between i and r as shown. If the speed of light in vacuum is c the Brewster angle for the medium is

APPLIED Class XII Part 2 · Ch 10 · **Page 270** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026. *Note: Brewster's law is not in the 2026-27 NCERT textbook.*

(A) 30° **(B)** 45° **(C)** 60° **(D)** 90°

22. In Young's double slit experiment, using monochromatic light of wavelength λ, the intensity of light at a point on the screen where path difference is λ is K units. The intensity of light at a point where path difference is $\frac{\lambda}{3}$ is

APPLIED Class XII Part 2 · Ch 10 · **Page 263** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) K **(B)** $\frac{K}{4}$ **(C)** 4K **(D)** 2K

23. Due to Doppler's effect the shift in wavelength observed is 0.1 Å for a star producing wavelength 6000 Å. Velocity of recession of the star will be

APPLIED Class XII Part 2 · Ch 10 · **Page 255** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026. *Note: the Doppler effect for light is not in the 2026-27 NCERT textbook.*

(A) 25 km/s **(B)** 10 km/s
(C) 5 km/s **(D)** 20 km/s

24. An electron is moving with an initial velocity $\vec{V} = V_0\hat{i}$ and is in a uniform magnetic field $\vec{B} = B_0\hat{j}$. Then its de Broglie wavelength

APPLIED Class XII Part 2 · Ch 11 · **Page 285** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) remains constant
(B) increases with time
(C) decreases with time
(D) increase and decreases periodically

25. Light of certain frequency and intensity incident on a photosensitive material causes photoelectric effect. If both the frequency and intensity are doubled, the photoelectric saturation current becomes

APPLIED Class XII Part 2 · Ch 11 · **Page 279** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) quadrupled **(B)** doubled
(C) halved **(D)** unchanged

26. A magnetic needle has a magnetic moment of 5×10^{-2} A m^2 and moment of inertia 8×10^{-6} kg m^2. It has a period of oscillation of 2 s in a magnetic field $\vec{B}$. The magnitude of magnetic field is approximately

APPLIED Class XII Part 1 · Ch 5 · **Page 139** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) 1.6×10^{-4} T **(B)** 0.4×10^{-4} T
(C) 3.2×10^{-4} T **(D)** 0.8×10^{-4} T

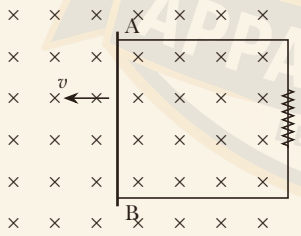

27. A toroid has 500 turns per metre length. If it carries a current of 2 A, the magnetic energy density inside the toroid is

APPLIED Class XII Part 1 · Ch 6 · **Page 169** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026. *Note: the toroid is not in the 2026-27 NCERT textbook.*

(A) 0.628 J/m^3 **(B)** 0.314 J/m^3
(C) 6.28 J/m^3 **(D)** 3.14 J/m^3

28. Consider the situation given in figure. The wire AB is slid on the fixed rails with a constant velocity. If the wire AB is replaced by a semicircular wire, the magnitude of the induced current will

APPLIED Class XII Part 1 · Ch 6 · **Page 163** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) increase
(B) remain same
(C) decrease
(D) increase or decrease depending on whether the semicircle bulges towards the resistance or away from it

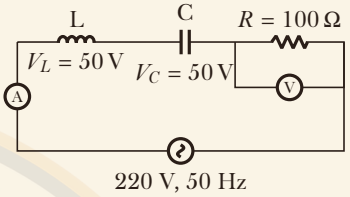

29. The frequency of an alternating current is 50 Hz. What is the minimum time taken by current to reach its peak value from rms value?

APPLIED Class XII Part 1 · Ch 7 · **Page 180** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) 5×10^{-3} s **(B)** 2.5×10^{-3} s
(C) 0.02 s **(D)** 10×10^{-3} s

30. The readings of ammeter and voltmeter in the following circuit are respectively

APPLIED Class XII Part 1 · Ch 7 · **Page 188** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) 1.2 A, 120 V **(B)** 1.5 A, 100 V
(C) 2.7 A, 220 V **(D)** 2.2 A, 220 V

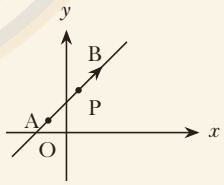

31. Two particles which are initially at rest move towards each other under the action of their mutual attraction. If their speeds are v and $2v$ at any instant, then the speed of center of mass of the system is,

APPLIED Class XI Part 1 · Ch 6 · **Page 97** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) $2v$ **(B)** Zero **(C)** $1.5v$ **(D)** v

32. A particle is moving uniformly along a straight line as shown in the figure. During the motion of the particle from A to B, the angular momentum of the particle about 'O'

APPLIED Class XI Part 1 · Ch 6 · **Page 109** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) increases
(B) decreases
(C) remains constant
(D) first increases then decreases

33. A satellite is orbiting close to the earth and has a kinetic energy K. The minimum extra kinetic energy required by it to just overcome the gravitation pull of the earth is

APPLIED Class XI Part 1 · Ch 7 · **Page 135** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) K **(B)** 2K **(C)** $\sqrt{3}$K **(D)** $2\sqrt{2}$K

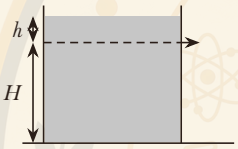

34. A wire is stretched such that its volume remains constant. The Poission's ratio of the material of the wire is

APPLIED Class XI Part 2 · Ch 8 · **Page 174** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) 0.50 **(B)** −0.50 **(C)** 0.25 **(D)** −0.25

35. A cylindrical container containing water has a small hole at height of $H = 8$ cm from the bottom and at a depth of 2 cm from the top surface of the liquid. The maximum horizontal distance travelled by the water before it hits the ground (x) is

APPLIED Class XI Part 2 · Ch 9 · **Page 189** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) 8 cm **(B)** $4\sqrt{2}$ cm
(C) 4 cm **(D)** 6 cm

36. An inductor of inductance L and resistor R are joined together in series and connected by a source of frequency ω. The power dissipated in the circuit is

APPLIED Class XII Part 1 · Ch 7 · **Page 191** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) $\dfrac{R^2+\omega^2L^2}{V}$ **(B)** $\dfrac{V^2R}{R^2+\omega^2L^2}$
(C) $\dfrac{V}{R^2+\omega^2L^2}$ **(D)** $\dfrac{V^2R}{\sqrt{R^2+\omega^2L^2}}$

37. An electromagnetic wave is travelling in x-direction with electric field vector given by, $\vec{E}_y = E_0 \sin(kx - \omega t)\,\hat{j}$. The correct expression for magnetic field vector is

DIRECT Class XII Part 1 · Ch 8 · **Page 206** Open PDF ↗

(A) $\vec{B}_y = E_0 C \sin(kx - \omega t)\,\hat{j}$
(B) $\vec{B}_z = E_0 C \sin(kx - \omega t)\,\hat{k}$
(C) $\vec{B}_y = \dfrac{E_0}{C}\sin(kx - \omega t)\,\hat{j}$
(D) $\vec{B}_z = \dfrac{E_0}{C}\sin(kx - \omega t)\,\hat{k}$

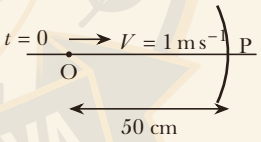

38. The phenomenon involved in the reflection of radiowaves by ionosphere is similar to

APPLIED Class XII Part 2 · Ch 9 · **Page 246** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) reflection of light by plane mirror
(B) total internal reflection of light in air during a mirage
(C) dispersion of light by water molecules during the formation of a rainbow
(D) scattering of light by air particles

39. A point object is moving uniformly towards the pole of a concave mirror of focal length 25 cm along its axis as shown below. The speed of the object is 1 m s^{-1}. At $t = 0$, the distance of the object from the mirror is 50 cm. The average velocity of the image formed by the mirror between time $t = 0$ and $t = 0.25$ s is:

APPLIED Class XII Part 2 · Ch 9 · **Page 224** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) 40 cm s^{-1} **(B)** 20 cm s^{-1}
(C) Zero **(D)** Infinity

40. A certain prism is found to produce a minimum deviation of 38°. It produces a deviation of 44° when the angle of incidence is either 42° or 62°. What is the angle of incidence when it is undergoing minimum deviation?

APPLIED Class XII Part 2 · Ch 9 · **Page 240** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) 30° **(B)** 40° **(C)** 49° **(D)** 60°

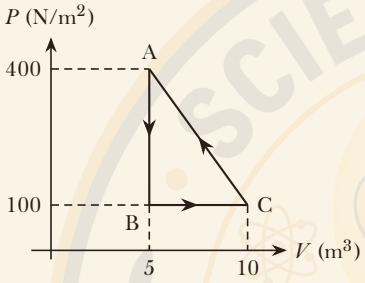

41. An aluminium sphere is dipped into water. Which of the following is true?

APPLIED Class XI Part 2 · Ch 10 · **Page 206** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) Buoyancy will be less in water at 0°C than that in water at 4°C
(B) Buoyancy will be more in water at 0°C than that in water at 4°C
(C) Buoyancy in water at 0°C will be same as that in water at 4°C
(D) Buoyancy may be more or less in water at 4°C depending on the radius of the sphere

42. A thermodynamic system undergoes a cyclic process ABC as shown in the diagram. The work done by the system per cycle is

APPLIED Class XI Part 2 · Ch 11 · **Page 235** Open PDF ↗

Similar PYQ: NEET 2014 – thermodynamic system taken round a cyclic process ABC, work done per cycle

(A) 750 J **(B)** −1250 J
(C) −750 J **(D)** 1250 J

43. One mole of O_2 gas is heated at constant pressure starting at 27°C. How much energy must be added to the gas as heat to double its volume?

APPLIED Class XI Part 2 · Ch 11 · **Page 233** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) Zero **(B)** 450 R
(C) 750 R **(D)** 1050 R

44. A piston is performing S.H.M. in the vertical direction with a frequency of 0.5 Hz. A block of 10 kg is placed on the piston. The maximum amplitude of the system such that the block remains in contact with the piston is

APPLIED Class XI Part 2 · Ch 13 · **Page 266** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) 1 m **(B)** 0.5 m **(C)** 1.5 m **(D)** 0.1 m

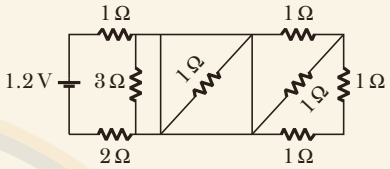

45. The equation of a stationary wave is $y = 2\sin\left(\frac{\pi x}{15}\right)\cos(48\pi t)$. The distance between a node and its next antinode is

APPLIED Class XI Part 2 · Ch 14 · **Page 290** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) 7.5 units **(B)** 1.5 units
(C) 22.5 units **(D)** 30 units

46. In the given circuit, the current through 2 Ω resistor is

APPLIED Class XII Part 1 · Ch 3 · **Page 97** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

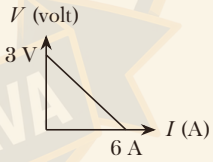

(A) 0.2 A **(B)** 0.3 A **(C)** 0.4 A **(D)** 0.1 A

47. Kirchhoff's junction rule is a reflection of

DIRECT Class XII Part 1 · Ch 3 · **Page 105** · Exemplar Q3.7 Open PDF ↗

(A) Conservation of current density vector
(B) Conservation of energy
(C) Conservation of momentum
(D) Conservation of charges

48. The variation of terminal potential difference (V) with current flowing through a cell is as shown

The emf and internal resistance of the cell are

KCET 2019 · Paper Analysis

1. Direct vs Applied

Direct from NCERT textbook (2026-27)	6
Direct from NCERT Exemplar	5
Applied (concept in NCERT)	49
Total	**60**

Direct: Q 15, 16, 20, 37, 54, 58.

Exemplar: Q 1, 3, 4, 7, 47.

2. Where the applied questions resemble earlier exams

Of the 49 applied questions, **2** closely resemble a question from an earlier national exam: NEET/AIPMT/AIIMS 1, JEE Main/Advanced 0, AIEEE 1. The other 47 (Q 2, 5, 6, 8, 9, 10, 11, 12, 13, 14, 17, 18, 19, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 38, 39, 40, 41, 43, 44, 45, 46, 48, 50, 51, 52, 53, 55, 56, 57, 59, 60) had no close match in the NEET, AIPMT, AIIMS, AIEEE and JEE papers of 2005–2026 that were searched; they are straightforward applications of NCERT concepts. **10** questions (Q 5, 6, 8, 9, 10, 19, 21, 23, 27, 49) test topics no longer in the 2026-27 NCERT textbook.

Strongest repeats: Q49 (AIEEE 2005, identical), Q42 (NEET 2014).

3. Difficulty level

Easy	35
Moderate	24
Hard	1

Hard: Q 39. Overall: **easy to moderate** and heavily conceptual; many questions are NCERT Exemplar MCQs. Q39 (image speed for a moving object in front of a concave mirror) is the hardest. Class XI: 15 questions, Class XII: 45. (Difficulty is the editor's assessment.)

4. Chapter-wise distribution

Chapter	Cl.	Qs	Dir	App
Units & Measurement	XI	1	0	1
Motion in a Straight Line	XI	1	0	1
Motion in a Plane	XI	1	0	1
Laws of Motion	XI	1	0	1
Work, Energy & Power	XI	1	1	0
Rotational Motion	XI	2	0	2
Gravitation	XI	1	0	1
Mech. Prop. of Solids	XI	1	0	1
Mech. Prop. of Fluids	XI	1	0	1
Thermal Prop. of Matter	XI	1	0	1
Thermodynamics	XI	2	0	2
Oscillations	XI	1	0	1
Waves	XI	1	0	1
Electric Charges & Fields	XII	2	1	1
Electrostatic Potential & Capacitance	XII	6	0	6
Current Electricity	XII	6	2	4
Moving Charges & Magnetism	XII	4	2	2
Magnetism & Matter	XII	3	1	2
Electromagnetic Induction	XII	2	0	2
Alternating Current	XII	3	0	3
Electromagnetic Waves	XII	2	1	1
Ray Optics	XII	3	0	3
Wave Optics	XII	3	0	3
Dual Nature	XII	2	0	2
Atoms	XII	3	1	2
Nuclei	XII	3	1	2
Semiconductor Electronics	XII	3	1	2

5. Teaching takeaways

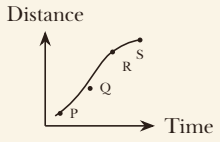

- Five questions are NCERT Exemplar MCQs asked word for word: Q1 (4.5), Q3 (4.6), Q4 (5.3), Q7 (14.1), Q47 (3.7). Solve the Exemplar MCQ-I sets.
- Ten questions are on topics removed from the rationalised NCERT (hysteresis, decay, transistor, logic gates, antenna, Brewster, Doppler, toroid, potentiometer).
- Direct NCERT lines: head-on collision has zero impact parameter (p. 294), nuclear force is negligible beyond a few fm (p. 313), $E \perp B \perp$ propagation (p. 206), dipole in a non-uniform field (p. 28).
- Only two questions resemble earlier national papers; Q49 repeats AIEEE 2005 word for word.

KCET 2018 · Paper Analysis

1. Direct vs Applied

Direct from NCERT textbook (2026-27)	10
Direct from NCERT Exemplar	1
Applied (concept in NCERT)	49
Total	**60**

Direct: Q 10, 20, 22, 28, 32, 38, 39, 48, 49, 51.

Exemplar: Q 5.

2. Where the applied questions resemble earlier exams

Of the 49 applied questions, **3** closely resemble a question from an earlier national exam: NEET/AIPMT/AIIMS 2, JEE Main/Advanced 0, AIEEE 1. The other 46 (Q 1, 2, 3, 4, 7, 8, 9, 11, 12, 13, 14, 15, 16, 17, 18, 19, 21, 23, 24, 25, 26, 27, 29, 30, 31, 33, 34, 35, 36, 37, 40, 41, 42, 43, 44, 45, 46, 47, 50, 52, 53, 54, 55, 56, 58, 60) had no close match in the NEET, AIPMT, AIIMS, AIEEE and JEE papers of 2005–2026 that were searched; they are straightforward applications of NCERT concepts. **11** questions (Q 7, 14, 23, 31, 33, 34, 54, 55, 56, 58, 59) test topics no longer in the 2026-27 NCERT textbook.

Strongest repeats: Q59 (AIEEE 2012, identical), Q57 (AIPMT 2011), Q6 (NEET 2016).

3. Difficulty level

Easy	43
Moderate	17
Hard	0

Overall: **easy**; mostly one-step formula and statement questions, with no question needing more than two steps. Class XI: 16 questions, Class XII: 44. (Difficulty is the editor's assessment.)

4. Chapter-wise distribution

Chapter	Cl.	Qs	Dir	App
Units & Measurement	XI	2	0	2
Motion in a Straight Line	XI	1	0	1
Laws of Motion	XI	2	0	2
Work, Energy & Power	XI	1	0	1
Rotational Motion	XI	1	0	1
Gravitation	XI	3	1	2
Mech. Prop. of Solids	XI	1	0	1
Mech. Prop. of Fluids	XI	1	1	0
Thermal Prop. of Matter	XI	1	0	1
Thermodynamics	XI	1	0	1
Kinetic Theory	XI	1	0	1
Waves	XI	1	0	1
Electric Charges & Fields	XII	2	0	2
Electrostatic Potential & Capacitance	XII	4	1	3
Current Electricity	XII	6	1	5
Moving Charges & Magnetism	XII	4	1	3
Magnetism & Matter	XII	2	1	1
Electromagnetic Induction	XII	2	0	2
Alternating Current	XII	5	2	3
Electromagnetic Waves	XII	1	0	1
Ray Optics	XII	3	0	3
Wave Optics	XII	4	1	3
Dual Nature	XII	3	1	2
Atoms	XII	2	1	1
Nuclei	XII	2	0	2
Semiconductor Electronics	XII	4	0	4

5. Teaching takeaways

- NCERT exercises and statements asked directly: Exercise 10.6 on two wavelengths (Q48, p. 273), Ohm's-law limitations (p. 89), power only in R and rms 220 V (p. 191, p. 180), $E_2 = -3.4$ eV (p. 300); Q5 is Exemplar XI 8.32.
- Eleven questions are on topics removed from the rationalised NCERT (errors, perpendicular-axis theorem, colour code, cyclotron, Earth's magnetism, half-life, transistor, Boolean algebra, antenna range).
- Q59 repeats AIEEE 2012 word for word; old AIEEE and AIPMT papers are useful revision.
- Q7 (errors) and Q23 (colour code) are lab-manual questions.

KCET 2017 · Paper Analysis

1. Direct vs Applied

Direct from NCERT textbook (2026-27)	14
Direct from NCERT Exemplar	0
Applied (concept in NCERT)	46
Total	**60**

Direct: Q 3, 7, 9, 10, 11, 13, 15, 32, 34, 41, 42, 46, 50, 55.

2. Where the applied questions resemble earlier exams

Of the 46 applied questions, **2** closely resemble a question from an earlier national exam: NEET/AIPMT/AIIMS 2, JEE Main/Advanced 0, AIEEE 0. The other 44 (Q 1, 2, 4, 5, 6, 8, 12, 14, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 30, 31, 33, 35, 36, 37, 38, 39, 40, 43, 44, 45, 47, 48, 49, 51, 52, 54, 56, 57, 58, 59, 60) had no close match in the NEET, AIPMT, AIIMS, AIEEE and JEE papers of 2005–2026 that were searched; they are straightforward applications of NCERT concepts. **9** questions (Q 36, 37, 44, 52, 53, 56, 57, 59, 60) test topics no longer in the 2026-27 NCERT textbook.

Strongest repeats: Q29 (AIPMT 2008, identical), Q53 (AIIMS 2006).

3. Difficulty level

Easy	46
Moderate	14
Hard	0

Overall: **easy**; the most statement-based paper of the eleven, with a large share of one-line definitions (Young's modulus, Pascal's law, sign convention, discovery of the nucleus). Class XI: 15 questions, Class XII: 45. (Difficulty is the editor's assessment.)

4. Chapter-wise distribution

Chapter	Cl.	Qs	Dir	App
Units & Measurement	XI	1	0	1
Motion in a Straight Line	XI	1	0	1
Motion in a Plane	XI	2	1	1
Laws of Motion	XI	1	0	1

Oscillations	XI	1	0	1
Waves	XI	1	1	0
Electric Charges & Fields	XII	3	0	3
Electrostatic Potential & Capacitance	XII	3	0	3
Current Electricity	XII	6	0	6
Moving Charges & Magnetism	XII	4	0	4
Magnetism & Matter	XII	3	2	1
Electromagnetic Induction	XII	3	0	3
Alternating Current	XII	3	0	3
Electromagnetic Waves	XII	2	1	1
Ray Optics	XII	3	1	2
Wave Optics	XII	3	1	2
Dual Nature	XII	2	0	2
Atoms	XII	2	1	1
Nuclei	XII	3	0	3
Semiconductor Electronics	XII	5	1	4

5. Teaching takeaways

- Fourteen questions are answered by a single NCERT line, e.g. Pascal's law (p. 182), mean energy $\frac{3}{2}k_BT$ (p. 250), Cartesian sign convention (p. 222), Rutherford and the nucleus (p. 293), $E_g < 3$ eV for semiconductors (p. 341).
- Nine questions are on topics removed from the rationalised NCERT (eddy currents, dip, scattering, reactor, decay, Zener, transistor, logic gates, communication).
- Q29 repeats AIPMT 2008 word for word; the same galvanometer question also appeared in KCET 2022 (Q44).
- Q27 (metre bridge with a heated coil) is a lab-manual question.

KCET 2016

Physics Question Paper

Version A-1 · 60 Questions · 60 Marks · 80 Minutes

1. A body falls freely for 10 sec. Its average velocity during this journey (take $g = 10\,\text{m s}^{-2}$)

APPLIED Class XI Part 1 · Ch 2 · **Page 17** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(1) $100\,\text{m s}^{-1}$ **(2)** $10\,\text{m s}^{-1}$
(3) $50\,\text{m s}^{-1}$ **(4)** $5\,\text{m s}^{-1}$

2. Three projectiles A, B and C are projected at an angle of 30°, 45°, 60° respectively. If R_A, R_B and R_C are ranges of A, B and C respectively, then (velocity of projection is same for A, B & C)

APPLIED Class XI Part 1 · Ch 3 · **Page 40** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(1) $R_A = R_B = R_C$ **(2)** $R_A = R_C > R_B$
(3) $R_A < R_B < R_C$ **(4)** $R_A = R_C < R_B$

3. The component of a vector $\vec{r}$ along x-axis will have a maximum value if

KCET 2016 · Paper Analysis

1. Direct vs Applied

Direct from NCERT textbook (2026-27)	5
Direct from NCERT Exemplar	3
Applied (concept in NCERT)	52
Total	**60**

Direct: Q 11, 17, 19, 38, 43.

Exemplar: Q 9, 16, 29.

2. Where the applied questions resemble earlier exams

Of the 52 applied questions, **3** closely resemble a question from an earlier national exam: NEET/AIPMT/AIIMS 2, JEE Main/Advanced 1, AIEEE 0. The other 49 (Q 1, 2, 3, 4, 5, 6, 8, 10, 12, 13, 14, 15, 18, 20, 21, 22, 23, 24, 25, 26, 27, 28, 30, 31, 32, 33, 34, 35, 36, 37, 39, 40, 42, 44, 45, 46, 47, 48, 49, 50, 51, 52, 54, 55, 56, 57, 58, 59, 60) had no close match in the NEET, AIPMT, AIIMS, AIEEE and JEE papers of 2005–2026 that were searched; they are straightforward applications of NCERT concepts. **12** questions (Q 7, 15, 30, 34, 35, 36, 50, 55, 56, 58, 59, 60) test topics no longer in the 2026-27 NCERT textbook.

Strongest repeats: Q41 (NEET 2021), Q53 (AIPMT 2005), Q7 (JEE Main 2021).

3. Difficulty level

Easy	41
Moderate	19
Hard	0

Overall: **easy**; mostly single-formula numericals. The three circuit questions Q25–27 take the longest. Class XI: 15 questions, Class XII: 45. (Difficulty is the editor's assessment.)

4. Chapter-wise distribution

Chapter	Cl.	Qs	Dir	App
Motion in a Straight Line	XI	1	0	1
Motion in a Plane	XI	2	0	2
Laws of Motion	XI	2	0	2
Rotational Motion	XI	2	0	2
Gravitation	XI	1	0	1
Mech. Prop. of Solids	XI	1	1	0
Mech. Prop. of Fluids	XI	1	0	1
Thermal Prop. of Matter	XI	2	1	1
Thermodynamics	XI	1	0	1
Oscillations	XI	1	0	1
Waves	XI	1	0	1
Electric Charges & Fields	XII	3	2	1
Electrostatic Potential & Capacitance	XII	4	1	3
Current Electricity	XII	7	0	7
Moving Charges & Magnetism	XII	4	1	3
Magnetism & Matter	XII	2	0	2
Electromagnetic Induction	XII	2	1	1
Alternating Current	XII	4	0	4
Electromagnetic Waves	XII	2	1	1
Ray Optics	XII	4	0	4
Wave Optics	XII	3	0	3
Dual Nature	XII	2	0	2
Atoms	XII	2	0	2
Nuclei	XII	3	0	3
Semiconductor Electronics	XII	3	0	3

5. Teaching takeaways

- NCERT examples asked almost verbatim: Example 10.8 (cooling pan, p. 221), Example 1.7 (electron falling in a field, p. 17), Example 6.7 (wheel with 10 spokes, p. 165); Exemplar Q9 (XI 9.4), Q16 (XII 1.10), Q29 (XII 4.4).
- Twelve questions are on topics removed from the rationalised NCERT (rolling, Doppler, cyclotron, Curie's law, dip, modulation, Fresnel distance, decay, regulation, transistor, logic gates).
- Only three questions resemble earlier national papers; NCERT examples and Exemplar MCQs are the better preparation for this paper.
- Q33 (galvanometer to voltmeter) is a lab-manual question.
