About this book. The 660 questions of KCET Physics 2016–2026 are arranged by the 28 chapters of the 2026-27 NCERT textbooks (Class XI, then Class XII). Inside a chapter the questions are grouped by topic, in the order the topics appear in the textbook, newest year first; each question shows the year and question number of the original paper and keeps its original option labels. Every question carries its NCERT tag (Direct or Applied, with the page and a link to the official chapter PDF). Each chapter ends with its answer key and a chapter summary: questions per year, topic-wise counts, direct and applied split and what to focus on. Questions on deleted portions are collected in their own section. The book ends with an overall summary and a preparation plan.

Prepared by Sumeet Birajadar for Science Monk online classes.

Units and Measurements

8 questions · 2 topics · KCET 2016–2026

Measurement and errors 4 Qs

1. KCET 2022 · Q21 The Vernier scale of a travelling microscope has 50 divisions which coincides with 49 main scale divisions. If each main scale division is 0.5 mm, then the least count of the microscope is

APPLIED Class XI Part 1 · Ch 1 · **Page 3** Open PDF ↗

Similar PYQ: JEE Main 2022 (26 Jun, Shift 2) – travelling microscope, 50 vernier divisions equal to 49 main-scale divisions

(A) 0.01 mm **(B)** 0.01 cm
(C) 0.5 cm **(D)** 0.5 mm

2. KCET 2020 · Q55 A cylindrical wire has a mass (0.3 ± 0.003) g, radius (0.5 ± 0.005) mm and length (6 ± 0.06) cm. The maximum percentage error in the measurement of its density is

APPLIED Class XI Part 1 · Ch 1 · **Page 6** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) 1 **(B)** 2 **(C)** 3 **(D)** 4

3. KCET 2018 · Q7 The resistance $R = \dfrac{V}{I}$ where $V = (100 \pm 5)$ V and $I = (10 \pm 0.2)$ A. The percentage error in R is

DIRECT Class XI Part 1 · Ch 1 · **Page 6** Open PDF ↗

(A) 5.2% **(B)** 4.8% **(C)** 7% **(D)** 3%

4. KCET 2017 · Q1 A substance of mass 49.53 g occupies 1.5 cm^3 of volume. The density of the substance (in g cm^{-3}) with correct number of significant figures is

DIRECT Class XI Part 1 · Ch 1 · **Page 6** · Example 1.2 Open PDF ↗

(A) 3.302 **(B)** 3.300 **(C)** 3.3 **(D)** 3.30

Dimensional analysis 4 Qs

5. KCET 2026 · Q1 Match the physical quantities given in List-I with dimensions expressed in terms of mass (M), length (L), time (T) and electric current (A) given in List-II.

List-I		*List-II*	
(a)	Torque	(i)	$[M^{-1}L^{-2}T^{4}A^{2}]$
(b)	Gravitational constant	(ii)	$[M^{1}L^{2}T^{-1}]$
(c)	Capacitance	(iii)	$[M^{-1}L^{3}T^{-2}]$
(d)	Planck's constant	(iv)	$[M^{1}L^{2}T^{-2}]$

Codes:

APPLIED Class XI Part 1 · Ch 1 · **Page 8** Open PDF ↗

Similar PYQ: JEE Main 2021 (25 Feb, Shift 1) – match-the-list of dimensions (h, E, V, p)

(1) a–iv, b–ii, c–iii, d–i
(2) a–iv, b–iii, c–i, d–ii
(3) a–iv, b–i, c–iii, d–ii
(4) a–ii, b–i, c–iii, d–iv

6. KCET 2025 · Q1 Which of the following expressions can be deduced on the basis of dimensional analysis? (All symbols have their usual meanings)

APPLIED Class XI Part 1 · Ch 1 · **Page 9** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(1) $s = ut + \frac{1}{2}at^2$ **(2)** $x = A\cos\omega t$
(3) $N = N_0 e^{-\lambda t}$ **(4)** $F = 6\pi\eta r v$

7. KCET 2019 · Q11 If P, Q and R are physical quantities having different dimensions, which of the following combinations can never be a meaningful quantity?

DIRECT Class XI Part 1 · Ch 1 · **Page 8** Open PDF ↗

(A) $\dfrac{P-Q}{R}$ **(B)** $PQ - R$
(C) $\dfrac{PQ}{R}$ **(D)** $\dfrac{PR - Q^2}{R}$

8. **KCET 2018 · Q4** The dimensions of the ratio of magnetic flux (ϕ) and permeability (μ) are

What to focus on

- 8 questions in 11 papers, about 0.7 per paper; rank 26 of 28 chapters by number of questions.
- Most asked topic: **Measurement and errors** (4 questions, in 4 of the 11 years).
- 1 questions are NCERT solved Examples or Exercises: Example 1.2 (Q 4). Work these by hand.
- NCERT pages that gave three or more questions: page 6 (3 questions). Read these pages line by line.
- Difficulty: 7 easy, 1 moderate, 0 hard.
- 5 applied questions; 2 closely resemble a NEET/JEE/AIEEE question (marked in their tags).

Class XI · Chapter 2

Motion in a Straight Line

11 questions · 1 topics · KCET 2016–2026

Kinematics in one dimension 11 Qs

1. KCET 2026 · Q2 A car covers the first half of the distance between two places at 40 km/h and another half at 50 km/h. The average speed of the car is

APPLIED Class XI Part 1 · Ch 2 · **Page 15** Open PDF ↗

Similar PYQ: NEET 2023 – average speed, half distance at 8 and half at 20

(1) 45.00 km/h **(2)** 44.44 km/h
(3) 43.14 km/h **(4)** 42.04 km/h

2. KCET 2026 · Q4 The velocity of a particle moving along x-axis is given as $V = x^2 - 5x + 4$ (in m/s) where x denotes the x-coordinate of the particle in metres. The magnitude of the acceleration of the particle when the velocity of the particle is zero is

APPLIED Class XI Part 1 · Ch 2 · **Page 18** Open PDF ↗

Similar PYQ: JEE Main 2024 (1 Feb, Shift 2), $v = 4\sqrt{x}$; AIEEE 2006, $v = \alpha\sqrt{x}$ – acceleration from $v(x)$

(1) 2 m/s^2 **(2)** 3 m/s^2
(3) Zero **(4)** 1 m/s^2

3. KCET 2025 · Q2 Two stones begin to fall from rest from the same height, with the second stone starting to fall 'Δt' seconds after the first falls from rest. The distance of separation between the two stones becomes 'H', 't_0' seconds after the first stone starts its motion. Then t_0 is equal to

APPLIED Class XI Part 1 · Ch 2 · **Page 18** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(1) $\dfrac{H}{g\Delta t}$ **(2)** $\dfrac{H}{\Delta t} + \dfrac{\Delta t}{2g}$
(3) $\dfrac{H}{g\Delta t} - \dfrac{\Delta t}{2}$ **(4)** $\dfrac{H}{g\Delta t} + \dfrac{\Delta t}{2}$

4. KCET 2023 · Q13 A body is moving along a straight line with initial velocity v_0. Its acceleration a is constant. After t seconds, its velocity becomes v. The average velocity of the body over the given time interval is

APPLIED Class XI Part 1 · Ch 2 · **Page 17** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) $\bar{v} = \dfrac{v^2 + v_0^2}{2at}$ **(B)** $\bar{v} = \dfrac{v^2 + v_0^2}{at}$
(C) $\bar{v} = \dfrac{v^2 - v_0^2}{2at}$ **(D)** $\bar{v} = \dfrac{v^2 - v_0^2}{at}$

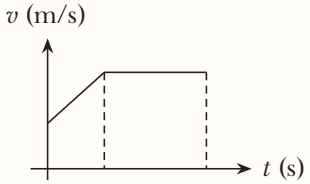

5. KCET 2022 · Q22 The displacement 'x' (in metre) of a particle of mass 'm' (in kg) moving in one dimension under the action of a force, is related to time 't' (in sec.) by, $t = \sqrt{x} + 3$. The displacement of the particle when its velocity is zero, will be

APPLIED Class XI Part 1 · Ch 2 · **Page 14** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) 6 m **(B)** 4 m **(C)** 2 m **(D)** 0 m

6. **KCET 2021 · Q1** For a body moving along a straight line, the following v-t graph is obtained.

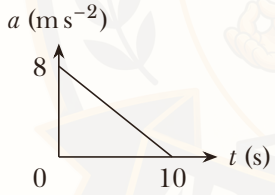

According to the graph, the displacement during

APPLIED Class XI Part 1 · Ch 2 · **Page 16** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) Uniform acceleration is greater than that during uniform motion.
(B) Uniform acceleration is less than that during uniform motion.
(C) Uniform acceleration is equal to that during uniform motion.
(D) Uniform motion is zero.

7. **KCET 2021 · Q2** A particle starts from rest. Its acceleration 'a' versus time 't' is shown in the figure. The maximum speed of the particle will be:

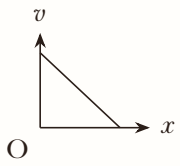

APPLIED Class XI Part 1 · Ch 2 · **Page 16** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) $80\ \text{m s}^{-1}$ **(B)** $40\ \text{m s}^{-1}$
(C) $18\ \text{m s}^{-1}$ **(D)** $2\ \text{m s}^{-1}$

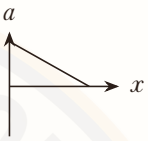

8. **KCET 2019 · Q12** The given graph shows the variation of velocity (v) with position (x) for a particle moving along a straight line

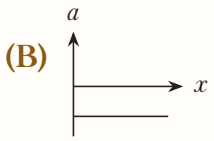

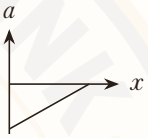

Which of the following graph shows the variation of acceleration (a) with position (x)?

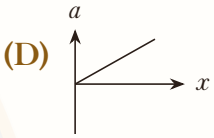

APPLIED Class XI Part 1 · Ch 2 · **Page 16** Open PDF ↗

Similar PYQ: NEET 2017 – same question: girl walking up a stationary and a moving escalator

(A) 25 sec **(B)** 60 sec
(C) 12 sec **(D)** 10 sec

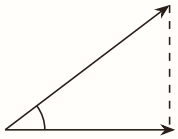

7. KCET 2020 · Q57 Rain is falling vertically with a speed of 12 m s^{-1}. A woman rides a bicycles with a speed of 12 m s^{-1} in east to west direction. What is the direction in which she should hold her umbrella?

DIRECT Class XI Part 1 · Ch 3 · **Page 31** · Example 3.1 Open PDF ↗

(A) 30° towards East
(B) 45° towards East
(C) 30° towards West
(D) 45° towards West

Projectile motion 8 Qs

8. KCET 2026 · Q3 Two bodies are projected with the same velocity. If one is projected at an angle of 30° and the other at 45° to the horizontal, then the ratio of maximum heights attained is

DIRECT Class XI Part 1 · Ch 3 · **Page 39** Open PDF ↗

(1) 3:1 **(2)** 1:2 **(3)** 4:1 **(4)** 1:3

9. KCET 2025 · Q3 In the projectile motion of a particle on a level ground, which of the following remains constant with reference to time and position?

DIRECT Class XI Part 1 · Ch 3 · **Page 38** Open PDF ↗

(1) Vertical component of the velocity of the projectile
(2) Average velocity between any two points on the path
(3) Horizontal component of velocity
(4) Angle between the instantaneous velocity with the horizontal

10. KCET 2022 · Q23 Two objects are projected at an angle $\theta°$ and $(90-\theta)°$, to the horizontal with the same speed. The ratio of their maximum vertical heights is

DIRECT Class XI Part 1 · Ch 3 · **Page 39** Open PDF ↗

(A) $1 : \tan\theta$ **(B)** $1 : 1$
(C) $\tan^2\theta : 1$ **(D)** $\tan\theta : 1$

11. KCET 2021 · Q3 The maximum range of a gun on horizontal plane is 16 km. If $g = 10$ m s^{-2}, then muzzle velocity of a shell is

DIRECT Class XI Part 1 · Ch 3 · **Page 40** Open PDF ↗

(A) 160 m s^{-1} **(B)** $200\sqrt{2}$ m s^{-1}
(C) 400 m s^{-1} **(D)** 800 m s^{-1}

12. KCET 2021 · Q4 The trajectory of a projectile is

DIRECT Class XI Part 1 · Ch 3 · **Page 39** Open PDF ↗

(A) semicircle
(B) an ellipse
(C) a parabola always
(D) a parabola in the absence of air resistance

13. KCET 2021 · Q5 For a projectile motion, the angle between the velocity and acceleration is minimum and acute at

APPLIED Class XI Part 1 · Ch 3 · **Page 39** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) only one point **(B)** two points
(C) three points **(D)** four points

14. KCET 2019 · Q13 The trajectory of a projectile projected from origin is given by the equation $y = x - \frac{2x^2}{5}$. The initial velocity of the projectile is

APPLIED Class XI Part 1 · Ch 3 · **Page 39** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) $\frac{2}{5}\,\mathrm{m\,s^{-1}}$ **(B)** $5\,\mathrm{m\,s^{-1}}$

(C) $25\,\mathrm{m\,s^{-1}}$ **(D)** $\frac{5}{2}\,\mathrm{m\,s^{-1}}$

15. KCET 2016 · Q2 Three projectiles A, B and C are projected at an angle of 30°, 45°, 60° respectively. If R_A, R_B and R_C are ranges of A, B and C respectively, then (velocity of projection is same for A, B & C)

DIRECT Class XI Part 1 · Ch 3 · **Page 40** Open PDF ↗

(1) $R_A = R_B = R_C$ **(2)** $R_A = R_C > R_B$

(3) $R_A < R_B < R_C$ **(4)** $R_A = R_C < R_B$

Circular motion 3 Qs

16. KCET 2025 · Q4 A particle is in uniform circular motion. The equation of its trajectory is given by $(x-2)^2 + y^2 = 25$, where x and y are in meter. The speed of the particle is $2\,\mathrm{m\,s^{-1}}$. When the particle attains the lowest 'y' co-ordinate, the acceleration of the particle is (in $\mathrm{m\,s^{-2}}$)

DIRECT Class XI Part 1 · Ch 3 · **Page 41** Open PDF ↗

(1) $0.4\,\hat{i}$ **(2)** $0.4\,\hat{j}$ **(3)** $0.8\,\hat{i}$ **(4)** $0.8\,\hat{j}$

17. KCET 2023 · Q14 A particle is in uniform circular motion. Related to one complete revolution of the particle, which among the statements is incorrect?

APPLIED Class XI Part 1 · Ch 3 · **Page 40** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) Displacement of the particle is zero.

(B) Average speed of the particle is zero.

(C) Average velocity of the particle is zero.

(D) Average acceleration of the particle is zero.

18. KCET 2017 · Q3 The angle between velocity and acceleration of a particle describing uniform circular motion is

DIRECT Class XI Part 1 · Ch 3 · **Page 40** Open PDF ↗

(A) 45° **(B)** 60° **(C)** 90° **(D)** 180°

Similar PYQ: JEE Main 2021 (17 Mar, Shift 1) – displacement where KE and PE of SHM are equal

(1) $\frac{A}{2}$ **(2)** $2A$ **(3)** $\frac{A}{\sqrt{2}}$ **(4)** $\sqrt{2}A$

3. KCET 2024 · Q29 For a particle executing simple harmonic motion (SHM), at its mean position

DIRECT Class XI Part 2 · Ch 13 · **Page 268** Open PDF ↗

(A) velocity is zero and acceleration is maximum

(B) velocity is maximum and acceleration is zero

(C) both velocity and acceleration are maximum

(D) both velocity and acceleration are zero

4. KCET 2022 · Q33 The displacement of a particle executing SHM is given by $x = 3\sin\left[2\pi t + \frac{\pi}{4}\right]$ where 'x' is in metres and 't' is in seconds. The amplitude and maximum speed of the particle is

DIRECT Class XI Part 2 · Ch 13 · **Page 266** Open PDF ↗

(A) 3 m, 6π m s^{-1} **(B)** 3 m, 2π m s^{-1}
(C) 3 m, 8π m s^{-1} **(D)** 3 m, 4π m s^{-1}

5. KCET 2021 · Q16 A pendulum oscillates simple harmonically if and only if

(I) the size of the bob of pendulum is negligible in comparison with the length of the pendulum.

(II) the angular amplitude is less than 10°.

APPLIED Class XI Part 2 · Ch 13 · **Page 270** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

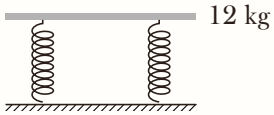

(A) Both (I) and (II) are correct

(B) Both (I) and (II) are incorrect

(C) Only (I) is correct

(D) Only (II) is correct

6. KCET 2020 · Q8 A tray of mass 12 kg is supported by two identical springs as shown in figure. When the tray is pressed down slightly and then released, it executes SHM with a time period of 1.5 s. The spring constant of each spring is

APPLIED Class XI Part 2 · Ch 13 · **Page 269** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) 50 N m^{-1} **(B)** 0
(C) 105 N m^{-1} **(D)** ∞

7. KCET 2019 · Q44 A piston is performing S.H.M. in the vertical direction with a frequency of 0.5 Hz. A block of 10 kg is placed on the piston. The maximum amplitude of the system such that the block remains in contact with the piston is

APPLIED Class XI Part 2 · Ch 13 · **Page 266** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) 1 m **(B)** 0.5 m **(C)** 1.5 m **(D)** 0.1 m

8. KCET 2017 · Q14 Two simple pendulums A and B are made to oscillate simultaneously and it is found that A completes 10 oscillations in 20 sec and B completes 8 oscillations in 10 sec. The ratio of the lengths of A and B is

DIRECT Class XI Part 2 · Ch 13 · **Page 271** Open PDF ↗

(A) $\frac{8}{5}$ **(B)** $\frac{64}{25}$ **(C)** $\frac{5}{4}$ **(D)** $\frac{25}{64}$

9. KCET 2016 · Q14 A particle executing SHM has a maximum speed of 0.5 m s^{-1} and maximum acceleration of 1.0 m s^{-2}. The angular frequency of oscillation is

Class XII · Chapter 1

Electric Charges and Fields

34 questions · 5 topics · KCET 2016–2026

Electric charge and Coulomb's law — 5 Qs

1. KCET 2024 · Q31 A body has a charge of $-3.2\ \mu C$. The number of excess electrons it has is

DIRECT — Class XII Part 1 · Ch 1 · **Page 5** Open PDF ↗

(A) 5.12×10^{25} (B) 5×10^{12}
(C) 2×10^{13} (D) 5.12×10^{13}

2. KCET 2024 · Q32 A point charge A of $+10\ \mu C$ and another point charge B of $+20\ \mu C$ are kept 1 m apart in free space. The electrostatic force on A due to B is $\vec{F}_1$ and the electrostatic force on B due to A is $\vec{F}_2$. Then

DIRECT — Class XII Part 1 · Ch 1 · **Page 9** Open PDF ↗

(A) $\vec{F}_1 = -2\vec{F}_2$ (B) $\vec{F}_1 = -\vec{F}_2$
(C) $2\vec{F}_1 = -\vec{F}_2$ (D) $\vec{F}_1 = \vec{F}_2$

3. KCET 2019 · Q56 A certain charge 2Q is divided at first into two parts q_1 and q_2. Later the charges are placed at a certain distance. If the force of interaction between two charges is maximum then $\frac{Q}{q_1} =$ _____.

APPLIED — Class XII Part 1 · Ch 1 · **Page 8** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) 4 (B) 2 (C) 1 (D) 0.5

4. KCET 2018 · Q18 The force of repulsion between two identical positive charges when kept with a separation 'r' in air is 'F'. Half the gap between the two charges is filled by a dielectric slab of dielectric constant = 4. Then the new force of repulsion between those two charges becomes

APPLIED — Class XII Part 1 · Ch 1 · **Page 8** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) $\frac{F}{3}$ (B) $\frac{F}{2}$ (C) $\frac{F}{4}$ (D) $\frac{4F}{9}$

5. KCET 2017 · Q16 Two spheres of electric charges +2 nC and −8 nC are placed at a distance 'd' apart. If they are allowed to touch each other, what is the new distance between them to get a repulsive force of same magnitude as before?

DIRECT — Class XII Part 1 · Ch 1 · **Page 11** · Example 1.4 Open PDF ↗

(A) $\frac{4d}{3}$ (B) $\frac{3d}{4}$ (C) d (D) $\frac{d}{2}$

Coulomb force and electric field 9 Qs

6. **KCET 2026 · Q21** An electron falls through a distance of 1.5 cm in a uniform electric field of magnitude 2.0×10^4 N/C from rest. The time taken to cover this distance in second is _____ ($e = 1.6 \times 10^{-19}$ C, $m_e = 9.11 \times 10^{-31}$ kg)

7. **KCET 2023 · Q28** Electric field at a distance 'r' from an infinitely long uniformly charged straight conductor, having linear charge density λ is E_1. Another uniformly charged conductor having same linear charge density λ is bent into a semicircle of radius 'r'. The electric field at its centre is E_2. Then

APPLIED Class XII Part 1 · Ch 1 · **Page 33** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) $E_2 = \dfrac{E_1}{r}$ **(B)** $E_1 = E_2$
(C) $E_1 = \pi r E_2$ **(D)** $E_2 = \pi r E_1$

8. **KCET 2022 · Q31** A charged particle of mass 'm' and charge 'q' is released from rest in an uniform electric field $\vec{E}$. Neglecting the effect of gravity, the kinetic energy of the charged particle after 't' second is

APPLIED Class XII Part 1 · Ch 1 · **Page 16** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) $\dfrac{Eqm}{t}$ **(B)** $\dfrac{2E^2t^2}{mq}$
(C) $\dfrac{E^2q^2t^2}{2m}$ **(D)** $\dfrac{Eq^2m}{2t^2}$

9. **KCET 2022 · Q34** Electrical as well as gravitational affects can be thought to be caused by fields. Which of the following is true for an electrical or gravitational field?

DIRECT Class XII Part 1 · Ch 1 · **Page 16** Open PDF ↗

(A) Fields are useful for understanding forces acting through a distance.
(B) The field concept is often used to describe contact forces.
(C) There is no way to verify the existence of a force field since it is just a concept.
(D) Gravitational or Electric field does not exist in the space around an object.

10. **KCET 2022 · Q35** Four charges $+q$, $+2q$, $+q$ and $-2q$ are placed at the corners of a square ABCD respectively. The force on a unit positive charge kept at the centre 'O' is

DIRECT Class XII Part 1 · Ch 1 · **Page 42** · Exercise 1.6 Open PDF ↗

(A) along the diagonal AC
(B) zero
(C) perpendicular to AD
(D) along the diagonal BD

11. **KCET 2021 · Q18** A copper rod AB of length l is rotated about end A with a constant angular velocity ω. The electric field at a distance x from the axis of rotation is

APPLIED Class XII Part 1 · Ch 1 · **Page 16** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) $\dfrac{m\omega^2 x}{e}$ **(B)** $\dfrac{m\omega x}{el}$
(C) $\dfrac{mx}{\omega^2 l}$ **(D)** $\dfrac{me}{\omega^2 x}$

12. **KCET 2020 · Q11** The electric field lines on the left have twice the separation on those on the right as shown in figure. If the magnitude of the field at A is $40\ \text{V m}^{-1}$, what is the force on 20 μC charge kept at B?

APPLIED Class XII Part 1 · Ch 1 · **Page 20** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) $4 \times 10^{-4}\ \text{V m}^{-1}$ **(B)** $8 \times 10^{-4}\ \text{V m}^{-1}$
(C) $16 \times 10^{-4}\ \text{V m}^{-1}$ **(D)** $1 \times 10^{-4}\ \text{V m}^{-1}$

13. **KCET 2018 · Q16** The magnitude of point charge due to which the electric field 30 cm away has the magnitude $2\ \text{N C}^{-1}$ will be

DIRECT Class XII Part 1 · Ch 1 · **Page 15** Open PDF ↗

(A) 2×10^{-11} C **(B)** 3×10^{-11} C
(C) 5×10^{-11} C **(D)** 9×10^{-11} C

14. **KCET 2016 · Q17** An electron of mass m, charge e falls through a distance h meter in a uniform electric field E. Then time of fall

DIRECT Class XII Part 1 · Ch 1 · **Page 17** · Example 1.7 Open PDF ↗

(1) $t = \sqrt{\dfrac{2hm}{eE}}$ **(2)** $t = \dfrac{2hm}{eE}$
(3) $t = \sqrt{\dfrac{2eE}{hm}}$ **(4)** $t = \dfrac{2eE}{hm}$

Electric potential and potential energy — 1 Q

15. **KCET 2021 · Q20** A 2-gram object, located in a region of uniform electric field $\vec{E} = (300\ \text{N C}^{-1})\,\hat{i}$ carries a charge Q. The object released from rest at $x = 0$, has a kinetic energy of 0.12 J at $x = 0.5$ m. Then Q is

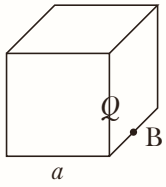

APPLIED Class XII Part 1 · Ch 1 · **Page 16** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

What to focus on

- 43 questions in 11 papers, about 3.9 per paper; rank 2 of 28 chapters by number of questions.
- Most asked topic: **Capacitors (energy, dielectrics)** (12 questions, in 9 of the 11 years).
- Asked in 8 or more of the 11 years: Electric potential and potential energy, Capacitors (energy, dielectrics), Capacitors (combination).
- 2 questions are NCERT solved Examples or Exercises: Exercise 2.9 (Q 27), Exercise 2.9 (Q 28). Work these by hand.
- NCERT pages that gave three or more questions: page 72 (6 questions), page 73 (5 questions), page 55 (4 questions), page 59 (3 questions), page 56 (3 questions), page 54 (3 questions). Read these pages line by line.
- Difficulty: 25 easy, 18 moderate, 0 hard.
- 20 applied questions; 1 closely resemble a NEET/JEE/AIEEE question (marked in their tags).

Current Electricity

61 questions · 10 topics · KCET 2016–2026

Current, drift velocity and mobility 14 Qs

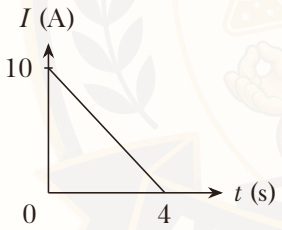

1. **KCET 2026 · Q29** The number of electrons moving per second through the filament of a lamp of 60 W operating at 120 V is nearly ($e = 1.6 \times 10^{-19}$ C) _____

APPLIED Class XII Part 1 · Ch 3 · **Page 82** Open PDF ↗

Similar PYQ: JEE Main 2024 (6 Apr, Shift 2) – electrons per second in a 110 W, 220 V filament

(1) 6.2×10^{18} **(2)** 6.2×10^{19}
(3) 3.1×10^{18} **(4)** 3.1×10^{19}

2. **KCET 2026 · Q31** Current flowing through a wire decreases linearly from 10 A to zero in 4 s as shown in the graph. Find the total charge flowing through the wire in the given time interval.

APPLIED Class XII Part 1 · Ch 3 · **Page 82** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(1) 40 C **(2)** 20 C **(3)** 10 C **(4)** 80 C

3. **KCET 2026 · Q32** In a conducting region, 10^{19} electrons and 10^{19} protons move to the left, while 10^{19} α-particles move to the right per second. The resulting electric current is ($e = 1.6 \times 10^{-19}$ C) _____

DIRECT Class XII Part 1 · Ch 3 · **Page 81** Open PDF ↗

(1) 3.2 A towards left
(2) 3.2 A towards right
(3) 1.6 A towards left
(4) 1.6 A towards right

4. **KCET 2025 · Q30** Given, a current carrying wire of non-uniform cross-section, which of the following is constant throughout the length of wire?

APPLIED Class XII Part 1 · Ch 3 · **Page 82** Open PDF ↗

Similar PYQ: AIPMT 2015 – conductor of non-uniform cross-section, quantity that remains constant

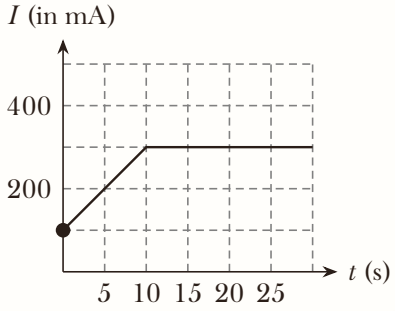

(1) Current, electric field and drift speed
(2) Drift speed
(3) Current and drift speed
(4) Current only

5. **KCET 2024 · Q38** $\vec{E}$ is the electric field inside a conductor whose material has conductivity σ and resistivity ρ. The current density inside the conductor is $\vec{j}$. The correct form of Ohm's law is

DIRECT Class XII Part 1 · Ch 3 · **Page 85** Open PDF ↗

(A) $\vec{E} = \sigma \vec{j}$ **(B)** $\vec{j} = \rho \vec{E}$
(C) $\vec{E} = \rho \vec{j}$ **(D)** $\vec{E} \cdot \vec{j} = \rho$

6. **KCET 2024 · Q40** The electric current flowing through a given conductor varies with time as shown in the graph below. The number of free electrons which flow through a given cross-section of the conductor in the time interval $0 \le t \le 20$ s is

APPLIED Class XII Part 1 · Ch 3 · **Page 82** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) 3.125×10^{19} **(B)** 1.6×10^{19}
(C) 6.25×10^{18} **(D)** 1.625×10^{18}

7. **KCET 2023 · Q30** For a given electric current the drift velocity of conduction electrons in a copper wire is v_d and their mobility is μ. When the current is increased at constant temperature

APPLIED Class XII Part 1 · Ch 3 · **Page 88** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) v_d remains the same, μ increases
(B) v_d decreases, μ remains the same
(C) v_d remains the same, μ decreases
(D) v_d increases, μ remains the same

8. **KCET 2022 · Q38** In an atom electrons revolve around the nucleus along a path of radius 0.72 Å making 9.4×10^{18} revolutions per second. The equivalent current is – [given $e = 1.6 \times 10^{-19}$ C]

DIRECT Class XII Part 1 · Ch 3 · **Page 82** Open PDF ↗

(A) 1.4 A **(B)** 1.2 A **(C)** 1.8 A **(D)** 1.5 A

9. **KCET 2022 · Q42** A charged particle is moving in an electric field of 3×10^{-10} V m^{-1} with mobility 2.5×10^{6} m^2/V/s, its drift velocity is

DIRECT Class XII Part 1 · Ch 3 · **Page 88** Open PDF ↗

(A) 2.5×10^{4} m/s **(B)** 7.5×10^{-4} m/s
(C) 1.2×10^{-4} m/s **(D)** 8.33×10^{-4} m/s

10. **KCET 2021 · Q28** A copper wire of length 1 m and uniform cross-sectional area 5×10^{-7} m^2 carries a current of 1 A. Assuming that there are 8×10^{28} free electrons per m^3 in copper, how long will an electron take to drift from one end of the wire to the other?

DIRECT Class XII Part 1 · Ch 3 · **Page 106** · Exercise 3.9 Open PDF ↗

(A) 0.8×10^{3} s **(B)** 1.6×10^{3} s
(C) 3.2×10^{3} s **(D)** 6.4×10^{3} s

11. **KCET 2019 · Q54** Though the electron drift velocity is small and electron charge is very small, a conductor can carry an appreciably large current because

DIRECT Class XII Part 1 · Ch 3 · **Page 88** · Example 3.2 Open PDF ↗

(A) electron number density is very large
(B) drift velocity of electron is very large
(C) electron number density depends on temperature
(D) relaxation time is small

12. **KCET 2017 · Q22** A cylindrical conductor of diameter 0.1 mm carries a current of 90 mA. The current density (in A m^{-2}) is ($\pi \simeq 3$)

DIRECT Class XII Part 1 · Ch 3 · **Page 84** Open PDF ↗

(A) 1.2×10^{7} **(B)** 2.4×10^{7}
(C) 3×10^{6} **(D)** 6×10^{6}

13. **KCET 2016 · Q23** Mobility of free electrons in a conductor is

DIRECT Class XII Part 1 · Ch 3 · **Page 89** Open PDF ↗

(1) directly proportional to electron density.
(2) directly proportional to relaxation time.
(3) inversely proportional to electron density.
(4) inversely proportional to relaxation time.

14. **KCET 2016 · Q32** The quantity of a charge that will be transferred by a current flow of 20 A over 1 hour 30 minutes period is

DIRECT Class XII Part 1 · Ch 3 · **Page 82** Open PDF ↗

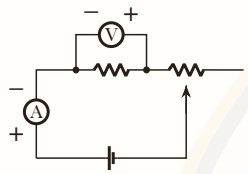

(1) 10.8×10^3 C **(2)** 10.8×10^4 C
(3) 5.4×10^3 C **(4)** 1.8×10^4 C

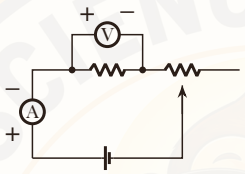

Ohm's law and measuring instruments 4 Qs

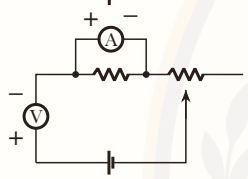

15. **KCET 2026 · Q60** Which of the following circuits is correct for verification of Ohm's law?

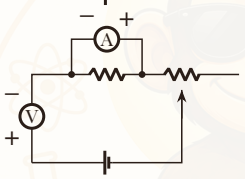

APPLIED Class XII Part 1 · Ch 3 · **Page 83** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

What to focus on

- 61 questions in 11 papers, about 5.5 per paper; rank 1 of 28 chapters by number of questions.
- Most asked topic: **Current, drift velocity and mobility** (14 questions, in 9 of the 11 years).
- Asked in 8 or more of the 11 years: Current, drift velocity and mobility, Kirchhoff's rules and DC circuits.
- 3 questions are NCERT solved Examples or Exercises: Example 3.2 (Q 11), Example 3.5 (Q 40), Exercise 3.9 (Q 10). Work these by hand.
- NCERT pages that gave three or more questions: page 97 (10 questions), page 84 (7 questions), page 82 (6 questions), page 90 (6 questions), page 93 (5 questions), page 101 (4 questions). Read these pages line by line.
- Difficulty: 39 easy, 21 moderate, 1 hard (hard: Q 49).
- 35 applied questions; 5 closely resemble a NEET/JEE/AIEEE question (marked in their tags).

What to focus on

- 21 questions in 11 papers, about 1.9 per paper; rank 10 of 28 chapters by number of questions.
- Most asked topic: **Faraday's law and Lenz's law** (8 questions, in 7 of the 11 years).
- 3 questions are NCERT solved Examples or Exercises: Example 6.7 (Q 14), Exercise 6.6 (Q 11), Exercise 6.7 (Q 16). Work these by hand.
- NCERT pages that gave three or more questions: page 163 (3 questions), page 165 (3 questions), page 168 (3 questions). Read these pages line by line.
- Difficulty: 14 easy, 7 moderate, 0 hard.
- 8 applied questions; 1 closely resemble a NEET/JEE/AIEEE question (marked in their tags).

Electromagnetic Waves

10 questions · 3 topics · KCET 2016–2026

Displacement current and Maxwell's equations 1 Q

1. KCET 2026 · Q46 Match the following Maxwell's equations: (The symbols used here have their usual meanings)

List-I

(a) Gauss' law for electrostatics
(b) Gauss' law for magnetism
(c) Faraday's law
(d) Ampere–Maxwell's law

List-II

(i) $\oint \vec{E} \cdot d\vec{A} = \frac{Q}{\varepsilon_0}$

(ii) $\oint \vec{B} \cdot d\vec{l} = \mu_0 \left[i_c + \varepsilon_0 \frac{d\phi_E}{dt} \right]$

(iii) $\oint \vec{B} \cdot d\vec{A} = 0$

(iv) $\oint \vec{E} \cdot d\vec{l} = -\frac{d\phi_B}{dt}$

Codes:

Electromagnetic waves (nature, E/B = c) 5 Qs

2. KCET 2023 · Q53 The ratio of the magnitudes of electric field to the magnetic field of an electromagnetic wave is of the order of

DIRECT Class XII Part 1 · Ch 8 · **Page 207** Open PDF ↗

(A) $10^5\ \mathrm{m\,s^{-1}}$ **(B)** $10^{-5}\ \mathrm{m\,s^{-1}}$
(C) $10^8\ \mathrm{m\,s^{-1}}$ **(D)** $10^{-8}\ \mathrm{m\,s^{-1}}$

3. KCET 2021 · Q41 Suppose that the electric field amplitude of electromagnetic wave is $E_0 = 120\ \mathrm{N\,C^{-1}}$ and its frequency is $f = 50$ MHz. Then which of the following value is incorrectly computed?

DIRECT Class XII Part 1 · Ch 8 · **Page 214** · Exercise 8.8 Open PDF ↗

(A) Magnetic field amplitude is 400 nT.
(B) Angular frequency of EM wave is $\pi \times 10^8$ rad/s
(C) Propagation constant (angular wave number) is 2.1 rad/m
(D) Wavelength of the EM wave is 6 m.

4. KCET 2021 · Q42 The source of electromagnetic waves can be a charge.

DIRECT Class XII Part 1 · Ch 8 · **Page 205** Open PDF ↗

(A) Moving with a constant velocity
(B) Moving in a circular orbit.
(C) At rest
(D) Moving parallel to the magnetic field

5. **KCET 2019 · Q37** An electromagnetic wave is travelling in x-direction with electric field vector given by, $\vec{E}_y = E_0 \sin(kx - \omega t)\,\hat{j}$. The correct expression for magnetic field vector is

DIRECT Class XII Part 1 · Ch 8 · **Page 206** Open PDF ↗

(A) $\vec{B}_y = E_0 C \sin(kx - \omega t)\,\hat{j}$
(B) $\vec{B}_z = E_0 C \sin(kx - \omega t)\,\hat{k}$
(C) $\vec{B}_y = \dfrac{E_0}{C} \sin(kx - \omega t)\,\hat{j}$
(D) $\vec{B}_z = \dfrac{E_0}{C} \sin(kx - \omega t)\,\hat{k}$

6. **KCET 2017 · Q41** If $\vec{E}$ and $\vec{B}$ represent electric and magnetic field vectors of an electromagnetic wave, the direction of propagation of the wave is along

DIRECT Class XII Part 1 · Ch 8 · **Page 206** Open PDF ↗

(A) $\vec{E}$ **(B)** $\vec{B}$ **(C)** $\vec{E} \times \vec{B}$ **(D)** $\vec{B} \times \vec{E}$

Electromagnetic spectrum — 4 Qs

7. **KCET 2026 · Q51** What range of electromagnetic spectrum is considered as light?

DIRECT Class XII Part 1 · Ch 8 · **Page 210** Open PDF ↗

(1) 1 mm to 700 nm
(2) 400 nm to 1 nm
(3) 400 nm to 700 nm
(4) 1 nm to 10^{-3} nm

8. **KCET 2025 · Q45** Match the following types of waves with their wavelength ranges

Waves		*Wavelength ranges*	
i.	Microwave	(a)	700 nm to 400 nm
ii.	Visible light	(b)	1 nm to 10^{-3} nm
iii.	Ultraviolet	(c)	0.1 m to 1 mm
iv.	X-rays	(d)	400 nm to 1 nm

What to focus on

- 25 questions in 11 papers, about 2.3 per paper; rank 9 of 28 chapters by number of questions.
- Most asked topic: **Photoelectric effect** (15 questions, in 11 of the 11 years).
- Asked in 8 or more of the 11 years: Photoelectric effect.
- 2 questions are NCERT solved Examples or Exercises: Example 11.1 (Q 16), Exercise 11.7 (Q 5). Work these by hand.
- NCERT pages that gave three or more questions: page 285 (8 questions), page 279 (6 questions), page 281 (3 questions). Read these pages line by line.
- Difficulty: 18 easy, 6 moderate, 1 hard (hard: Q 17).
- 10 applied questions; 1 closely resemble a NEET/JEE/AIEEE question (marked in their tags).

Class XII · Chapter 13

Nuclei

14 questions · 6 topics · KCET 2016–2026

Nuclear composition, size and density — 2 Qs

1. KCET 2025 · Q53 Match the following types of nuclei with examples shown

Column-I		*Column-II*	
(A)	Isotopes	(i)	$_3Li^7$, $_4Be^7$
(B)	Isobars	(ii)	$_8O^{18}$, $_9F^{19}$
(C)	Isotones	(iii)	$_1H^1$, $_1H^2$

DIRECT — Class XII Part 2 · Ch 13 · **Page 309** Open PDF ↗

(1) A–iii, B–i, C–ii **(2)** A–ii, B–iii, C–i
(3) A–i, B–iii, C–ii **(4)** A–iii, B–ii, C–i

2. KCET 2024 · Q9 The ratio of volume of Al^{27} nucleus to its surface area is (Given $R_0 = 1.2 \times 10^{-15}$ m)

APPLIED — Class XII Part 2 · Ch 13 · **Page 309** Open PDF ↗

Similar PYQ: None found in NEET/AIPMT/AIEEE/JEE papers, 2005–2026 (NCERT concept application)

(A) 2.1×10^{-15} m **(B)** 1.3×10^{-15} m
(C) 0.22×10^{-15} m **(D)** 1.2×10^{-15} m

Mass defect, binding energy, fission and fusion — 5 Qs

3. KCET 2024 · Q10 Consider the nuclear fission reaction

$$_0^1n + {}_{92}^{235}U \rightarrow {}_{56}^{144}Ba + {}_{36}^{89}Kr + 3\,{}_0^1n.$$

Assuming all the kinetic energy is carried away by the fast neutrons only and total binding energies of $_{92}^{235}U$, $_{56}^{144}Ba$ and $_{36}^{89}Kr$ to be 1800 MeV, 1200 MeV and 780 MeV respectively, the average kinetic energy carried by each fast neutron is (in MeV)

Earth's magnetism (incl. angle of dip) — 7 Qs

9. **KCET 2023 · Q39** The horizontal component of Earth's magnetic field at a place is 3×10^{-5} T. If the dip at that place is 45°, the resultant magnetic field at that place is

DELETED PORTION — Earth's magnetism (angle of dip) · removed from the 2026-27 NCERT; not analysed

(A) $\frac{3}{\sqrt{2}}\times10^{-5}$ T **(B)** $\frac{3}{2}\sqrt{3}\times10^{-5}$ T
(C) $3\sqrt{2}\times10^{-5}$ T **(D)** 3×10^{-5} T

10. **KCET 2022 · Q51** Which of the following statements proves that Earth has a magnetic field?

DELETED PORTION — Earth's magnetism · removed from the 2026-27 NCERT; not analysed

(A) Earth is surrounded by ionosphere.
(B) The intensity of cosmic rays stream of charged particles is more at the poles than at the equator.
(C) A large quantity of iron-ore is found in the Earth.
(D) Earth is a planet rotating about the North South axis.

11. **KCET 2021 · Q34** Earth's magnetic field always has a horizontal component except at

DELETED PORTION — Earth's magnetism · removed from the 2026-27 NCERT; not analysed

(A) equator
(B) magnetic poles
(C) a latitude of 60°
(D) an altitude of 60°

12. **KCET 2018 · Q33** The strength of the Earth's magnetic field is

DELETED PORTION — Earth's magnetism · removed from the 2026-27 NCERT; not analysed

(A) Constant everywhere
(B) Zero everywhere
(C) Having very high value
(D) Varying from place to place on the Earth's surface

13. **KCET 2018 · Q34** A jet plane having a wing-span of 25 m is travelling horizontally towards east with a speed of 3600 km/hour. If the Earth's magnetic field at the location is 4×10^{-4} T and the angle of dip is 30°, then, the potential difference between the ends of the wing is

DELETED PORTION — Earth's magnetism (angle of dip) · removed from the 2026-27 NCERT; not analysed

(A) 4 V **(B)** 5 V **(C)** 2 V **(D)** 2.5 V

14. **KCET 2017 · Q37** A jet plane of wing span 20 m is travelling towards west at a speed of 400 m s^{-1}. If the earth's total magnetic field is 4×10^{-4} T and the dip angle is 30°, at that place, the voltage difference developed across the ends of the wing is

DELETED PORTION — Earth's magnetism (angle of dip) · removed from the 2026-27 NCERT; not analysed

(A) 1.6 V **(B)** 3.2 V **(C)** 0.8 V **(D)** 6.4 V

15. KCET 2016 · Q35 At certain place, the horizontal component of earth's magnetic field is 3.0 G and the angle dip at that place is 30°. The magnetic field of earth at that location

DELETED PORTION — Earth's magnetism (angle of dip) · removed from the 2026-27 NCERT; not analysed

Answers solved by the editor. Option labels are those of the original paper: (1)–(4) for 2016, 2025 and 2026, (A)–(D) for 2017–2024. –: no option is correct. *: see note.

6. (KCET 2018 Q56) $\bar{B}$ also equals 1 here, so option (B) has the same value.

59. (KCET 2019 Q26) The data give $B = 4\pi^2 I/(MT^2) \approx 1.6 \times 10^{-3}$ T; option (A) is the intended one.

84. (KCET 2023 Q11) Taken literally (six outer discs): $27mR^2$. If all seven discs are meant: $55mR^2/2$, option (B).

88. (KCET 2023 Q42) None of the options is dimensionally correct (each lacks a factor of m).

	Class XI total												**165**	
	Class XII total												**406**	

Class XII gives 71% of the in-syllabus questions and Class XI 29%. The six heaviest chapters, Current Electricity (61), Electrostatic Potential and Capacitance (43), Moving Charges and Magnetism (42), Ray Optics and Optical Instruments (41), Electric Charges and Fields (34), Alternating Current (31), together give 252 questions, 44% of the total. The pages that follow give the year-wise summary, the most repeated topics and the preparation plan.

KCET 2016–2026 · Summary

Every question of the eleven papers was checked one by one against the four 2026-27 NCERT Physics books (Class XI Part 1 & 2, Class XII Part 1 & 2). Direct: the answer is stated in the textbook (text, summary, table or figure), or the question is an NCERT solved Example or Exercise (same or changed numbers), or it needs only one printed formula. Applied: the concept is in the textbook but the question needs several steps or a new situation. Deleted portion: the topic was removed from the rationalised syllabus; such questions are not analysed. Percentages are of the analysed questions.

Year	Direct				Applied	Analysed	Deleted	Direct
	Total	Text	Example	Exercise			portion	%
2026	**37**	32	3	2	23	60	0	62%
2025	**38**	34	3	1	22	60	0	63%
2024	**24**	21	2	1	28	52	8	46%
2023	**20**	14	2	4	24	44	16	45%
2022	**34**	27	2	5	23	57	3	60%
2021	**26**	20	3	3	26	52	8	50%
2020	**25**	18	4	3	24	49	11	51%
2019	**20**	18	1	1	28	48	12	42%
2018	**32**	25	4	3	18	50	10	64%
2017	**35**	26	7	2	16	51	9	69%
2016	**27**	22	4	1	21	48	12	56%
Total	**318**	257	35	26	253	571	**89**	56%

Of the 660 questions, **571** are within the present syllabus. Of these, **318** (56%) are direct from the NCERT textbook and 253 (44%) are applications of NCERT concepts. **89** questions (13% of all 660) are from deleted portions; most of them are in the papers of 2016–2024, which were set before the rationalised syllabus was fully followed. KCET 2025 and 2026 have no question from a deleted portion.

Deleted portions asked, 2016–2026 (number of questions):

Digital electronics (logic gates) (8);
Earth's magnetism (incl. angle of dip) (7);
Alpha- and beta-decay (6);
Radioactive decay law (half-life, mean life, activity) (6);
Cyclotron (5);
Doppler effect (5);
Transistor (incl. amplifier) (5);
Communication systems (incl. antenna) (4);
Resistor colour code (4);
Curie's law (3);
LC oscillations (3);
Hysteresis and coercivity (2);
Oscillation period of a magnetic needle (2);
Perpendicular axis theorem (2);
Potentiometer (2);
Radiation pressure of EM waves (2);
Rolling motion (2);
Sharpness of resonance (Q-factor) (2);
Toroid (2);
Zener diode (2);
Accuracy and precision of measurements (1);
Brewster's law (1);
Charging by induction (1);
Coefficient of restitution (1);
Curie–Weiss law (1);
Damped oscillations (1);
Eddy currents (1);
Fresnel distance (1);
Light-emitting diode (1);
Parallel axis theorem (1);
Photodiode (1);
Resolving power of the eye (1);
Scattering of light (1);
Velocity selector (1);
Voltage regulation (1).

The 15 Most Repeated Topics

Every in-syllabus question of 2016–2026 was given one topic label while the answer keys were solved. The table counts the questions on each topic over the eleven papers (deleted portions left out; ties are ordered by the number of years in which the topic appeared). Years in bold are the years the topic was asked.

#	Topic	NCERT chapter	Qs	Years	2016 → 2026
1	Bohr model of hydrogen atom	Atoms (XII)	**20**	11	**16 17 18 19 20 21 22 23 24 25 26**
2	AC circuits (reactance, LCR, phase)	Alternating Current (XII)	**16**	11	**16 17 18 19 20 21 22 23 24 25 26**
3	Biot-Savart law and magnetic fields	Moving Charges & Magnetism (XII)	**16**	9	**16 17 18 19 20** 21 **22** 23 **24 25 26**
4	Gauss's law and electric flux	Electric Charges & Fields (XII)	**16**	8	**16 17** 18 19 **20 21** 22 **23 24 25 26**
5	Photoelectric effect	Dual Nature (XII)	**15**	11	**16 17 18 19 20 21 22 23 24 25 26**
6	Current, drift velocity and mobility	Current Electricity (XII)	**14**	9	**16 17** 18 **19** 20 **21 22 23 24 25 26**
7	Lenses and lens maker's formula	Ray Optics (XII)	**14**	8	**16** 17 **18** 19 **20 21 22 23 24 25** 26
8	Kinematics in one dimension	Motion in a Straight Line (XI)	**12**	10	**16 17 18 19** 20 **21 22 23 24 25 26**
9	Capacitors (energy, dielectrics)	Electrostatic Potential & Capacitance (XII)	**12**	9	**16 17 18 19** 20 **21 22 23 24** 25 **26**
10	Kirchhoff's rules and DC circuits	Current Electricity (XII)	**12**	8	**16 17 18 19 20** 21 22 **23 24** 25 **26**
11	Electric potential and potential energy	Electrostatic Potential & Capacitance (XII)	**11**	10	**16 17 18 19 20 21 22 23** 24 **25 26**
12	AC power and rms values	Alternating Current (XII)	**11**	6	**16** 17 **18 19** 20 21 **22** 23 24 **25 26**
13	Elasticity (Young's modulus)	Mech. Prop. of Solids (XI)	**10**	10	**16 17 18 19 20** 21 **22 23 24 25 26**
14	Electric dipole	Electric Charges & Fields (XII)	**10**	9	**16 17** 18 **19 20 21 22 23** 24 **25 26**
15	Young's double-slit interference	Wave Optics (XII)	**10**	9	**16 17 18 19 20 21 22 23** 24 25 **26**

These 15 topics carry **199** of the 571 in-syllabus questions (35%), about 18 questions in every paper. Only Kinematics in one dimension and Elasticity (Young's modulus) are from Class XI; the rest are Class XII.

Questions asked again, almost word for word (in the present syllabus)

2019 Q20 = 2020 Q48	two protons 10 nm apart: nuclear force vs Coulomb force
2019 Q4 = 2020 Q30	permanent magnet at room temperature: domains partly aligned
2019 Q17 ≈ 2020 Q45	frequency (2019) and period (2020) of the electron in the nth Bohr orbit
2018 Q37 ≈ 2026 Q44	current in a 100 W bulb on 220 V, 50 Hz AC

How to Prepare for KCET Physics

Every point below comes from the question-by-question analysis of the eleven papers in this book.

1. What the papers show

- **56%** of the in-syllabus questions (318 of 571) are direct from the NCERT textbook; the rest (253) apply NCERT concepts. Only 42 applied questions closely resemble a NEET/JEE/AIEEE question.
- 35 questions are NCERT solved Examples and 26 are NCERT Exercises, often with the same numbers.
- Class XII gives **71%** of the questions, Class XI 29%.
- Heaviest chapters (questions in 11 years): Current Electricity (61), Electrostatic Potential & Capacitance (43), Moving Charges & Magnetism (42), Ray Optics (41), Electric Charges & Fields (34), Alternating Current (31).
- Difficulty: 360 easy, 202 moderate, only 9 hard. KCET rewards speed and accuracy more than tricks.
- 89 old questions are on deleted topics; 2025 and 2026 had none. The rationalised NCERT is the syllabus now.
- Questions do come back (see the previous page), so the old papers are worth solving fully.

2. What to study from

1. **NCERT Physics 2026-27** (XI Parts 1–2, XII Parts 1–2): the main book. Read every line, including the boxes, tables, figures, Summary and Points to Ponder.
2. **NCERT solved Examples and Exercises**: work all of them by hand. They are the single biggest source of numerical questions.
3. **NCERT Exemplar Physics**: for the applied questions; the MCQ and short-answer sections are enough.
4. **NCERT Lab Manual**: KCET 2022 and 2025 asked the vernier least count, the half-deflection formula for a galvanometer and real/apparent depth from it.
5. **KCET papers 2016–2026** (this book), solved under time, with the answer keys.
6. One standard reference for extra MCQ practice only after NCERT is complete. Do not start a new book in the last month.

3. How to work

- Make a one-page formula and fact sheet for each chapter while reading NCERT. Revise from these sheets.
- Keep an error notebook: every wrong or guessed question, the reason, and the right idea. Read it every week.
- Practise the graph, circuit and ray-diagram questions; about one question in four has a figure (153 of 660).
- Learn units, dimensions, standard values (e, h, c, m_e, 13.6 eV, 1 u = 931.5 MeV) and the ratio and proportion short cuts; they save time in nearly every paper.
- Check every old question against the present syllabus; skip the ones marked Deleted Portion.

4. Plan of action

Phase	Work
1. Foundation	NCERT chapter by chapter, Class XII first (it carries about 70% of the marks): text, Examples, Exercises, formula sheet.
2. Class XI	The same for Class XI, with more time on Motion in a Plane, Laws of Motion, Rotational Motion, Gravitation and Thermodynamics.
3. Topic drills	Solve this book topic by topic; start with the 15 most repeated topics. Then Exemplar MCQs on the same topics.
4. Full papers	One complete KCET paper every two days: 60 questions in 80 minutes. Check with the key and update the error notebook.
5. Last 2 weeks	Only revision: formula sheets, NCERT Summaries, error notebook, and a paper on alternate days. No new material.

5. In the examination hall

- 80 minutes for 60 questions is 80 seconds each. First pass: answer every direct NCERT question at once (about half the paper).
- Second pass: the numericals; leave any question that takes more than two minutes and come back.
- KCET has had no negative marking, so mark an answer for every question before time is up.
- Fill the OMR as you go, not at the end.

6. A weekly rhythm

Five days of NCERT and practice, one day of a timed paper, one day of revision and the error notebook. A steady 2–3 hours of Physics a day, kept up for months, beats long sessions before the exam.
