College Dashboard — PDF Export Guide

Science Monk Academy · Admin → College tab

Where the PDF buttons are

Every table below has a **PDF** button and a **CSV** button in its top-right corner. Tap **PDF** to open a clean printable page and your device's print dialog — then choose **Save as PDF**.

Tab	Report	Good for
Absent Lists	Overall Absent List	Parents' WhatsApp group — no phone numbers
Absent Lists	Section Wise Absent List	Office use — includes parent phone numbers
Lecturers	Teaching hours per lecturer	Monthly / yearly workload record
Staff Attendance	Month summary	Lecturer present/absent counts
Fees	Fee overview	Total, collected and pending fees

How to save as PDF

1. Open the app, choose **Principal (Admin)** and sign in.
2. Go to the **College** tab, then the sub-tab you want (e.g. Absent Lists).
3. Pick the date or section if the report asks for one.
4. Tap the **PDF** button beside the table.
5. In the print dialog, set the destination to **Save as PDF** and tap Save.

On an Android phone the print screen also has a "Save as PDF" option, so the same buttons work on mobile.

Before it works on the live app

- Merge the work branch into **main** so the live site updates.
- Deploy the database rules once: `firebase deploy --only firestore:rules`
- Create your principal login (a Firebase user + an entry in the `admins` list).
- Add some sections, students and attendance — reports need data to show.

The PDF is produced inside your own app from your own data — nothing is shared with any other website.
